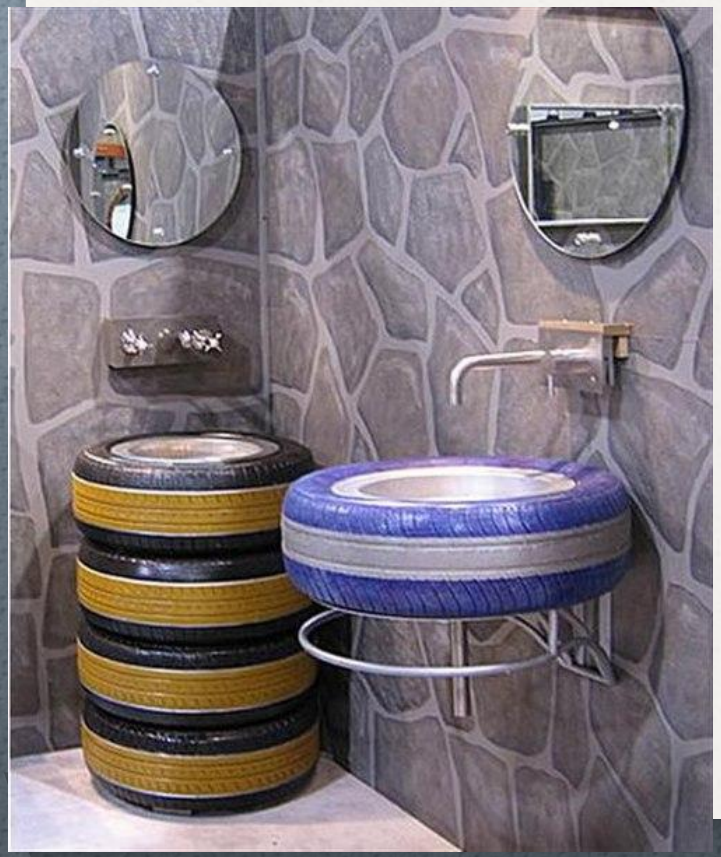
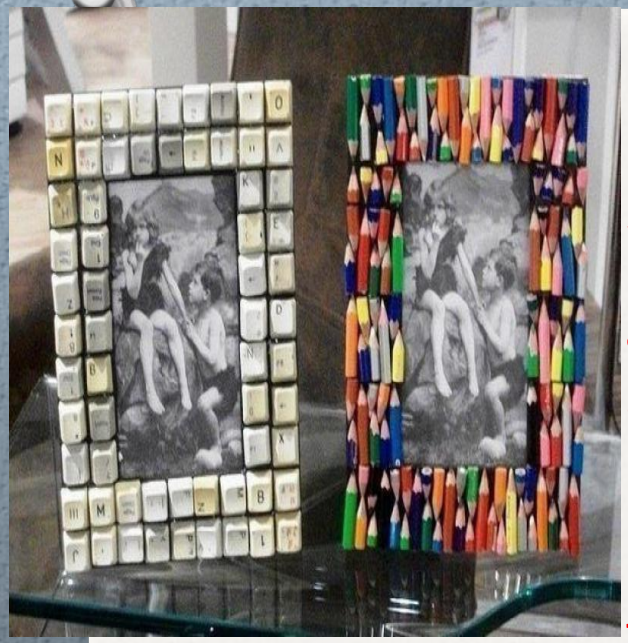
«The Second life of things»
10 класс

There are a lot of useless things in every house. These things can be thrown out. But this is a mistake of many people.
Such unusual and usefull things could be made from garbage.

For example, from Cutlery you can make some interesting articles of decoration

Some beautiful crafts made from tires





You can add a special colouring into the interior with the help of unnecessary and useless things.

For your flowers you can find the beautiful decision from scrap unnecessary things

Everyone can give rein to your imagine and make interesting practical and useful things from rubbish.
