

Mobile phones: advantages and disadvantages

Made by:

Golopapa V.G.

School №4

Introduction

The aim: determine if the mobile phone can be dangerous for the health.

The objectives:

- ❖ find advantages and disadvantages of mobile phones
- ❖ describe the tips how to protect yourself from mobile phone
- ❖ conduct the research among the students

The hypothesis: The older the child, the more he uses the mobile phone and he doesn't think about harm of the mobile phone.

A lot of people think that using mobile phones is not harm . With help of this research we will find if it is true or maybe mobile phones are very useful for our health. That's why the research can be very **actual**.

History of mobile phones

The first mobile phone invented for practical use was by a **Motorola** employee called Martin Cooper who is widely considered to be a key player in the history of mobile phones.

handheld mobile
phone prototype

Advantages

- **Easy Communication**
- **Always Connected**
- **Multiple Uses**
- **Emergency Situations**
- **Advertisements**

Disadvantages

- Constant Interruption
- Possibility of Privacy Leak
- Distraction
- Affect Real Interaction
- Wasting time
- Harm for health
- Recurring expenses
- Dangerous for environment
- Advertisements
- Tracking Device

Practical part

- What purposes do you use a telephone for?

How much time do you usually spend using a telephone?

What benefits have we using a telephone?

What harm have we using a telephone?

Conclusion

- We have reached the aim
- Found that the older the child, the more he uses the mobile phone and he doesn't think about harm of the mobile phone.
- **THE hypothesis was proved**
- Older students use a telephone more than 3 hours a day

Some tips

- 1. Distance is your friend
- 2. Avoid using your cell phone when the signal is weak
- 3. Avoid carrying your cell phone on your body at all times
- 4. Children should only use cell phones for emergencies.
- 5. Do not sleep with your cell phone powered on.
- 6. Use your home and office corded landline for most conversations
- 7. Avoid using your cell phone in metal contained spaces like a car, elevator, bus, train or airplane..
- 8. Whenever possible, minimize talk time and choose to communicate via text messaging rather than making a voice call
- 9. Protect your fertility.
- 10. Read your cell phone manual
