

Задачи уроки

- □ Образовательные задачи:
- активизировать лексику по теме в разных видах деятельности:
 чтение, аудирование, говорение, письмо.
- обсуждать проблемы по теме.
- □ повторить грамматическую тему «Условные предложения»
- Развивающие задачи:
 - повышение интереса к изучению языка;
- учить решать самостоятельно проблемы на основе изученной лексики.
- □ Воспитательные задачи:
- □ формирование экологического мировоззрения;
- чувство ответственности за место, где ты живёшь.

What is environment?

Our land is full of beautiful flowers, plants, trees which grow and blossom in the meadows, on the banks of the rivers and lakes, in the forests and in our gardens.

Many flowers became rare and vanish. Our useful insects: bees, bumble - bees, dragonflies, grasshoppers can't live in the atmosphere of chemical and pesticides. Many birds and fish die because of the polluted air and water.

The next important problem is air pollution. Excessive radiation and transport, factories and plants are harmful to people and animals. It also destroys the ozone layer which protects the Earth from the dangerous light of the Sun.

Another problem is that our forest are dying from acid rain. Very often industry is developing without any care of the environment. The intensive development of sciences, industry and chemistry in the 20th has made the pollution of our environment a global problem which should be solved by all means. That's why students and teachers must take part in controlling and protect nature.

New word and word combination

- extinct
- exhaust
- destruction
- environment
- ecology
- □ to pollute (air, water, land)
- to save (animals)
- Habitat
- Litter
- Living things
- Recycle
- Protection
- Nuclear
- fragile

The Fragile Planet

Every ten minutes one kind of animal, plant or insect dies out forever.

If / when clauses - условные предложения первого типа Use "if + present simple + will + bare infinitive"

Match the two columns to get a correct sentence.

- 1. If nuclear power station go wrong,
- 2. If people stay in direct sunlight for a long time
- 3. If there is no ozone layer in the atmosphere,
- 4. If people use filters at nuclear power station,
- 5. If factories dump their waste in the rivers, want to survive,

6. If people

- 1. we won't be protected from ultraviolet radiation.
- 2. they will clean air again.
- 3. they will cause nuclear pollution.
- 4. they will ultraviolet radiation from the sun.
- 5. they will solve the environment problems.
- 6. they will become dirty and poisoned
