

An aerial photograph of a savanna landscape. A wide, light-colored river or dry lake bed flows from the top left towards the center. To the right of the river is a large, dense, green forested area. The foreground and middle ground consist of a mix of green grass and scattered trees. In the bottom right corner, there is a small, cleared area with some structures and a few animals, possibly a wildlife reserve or a small settlement. The sky is a pale blue with some light clouds.
