**Match the
picture with
its description**

- The official or political name of the country is The UNITED STATES OF AMERICA because the country consists of 50 states. The country is usually known by a shorter name or the abbreviation THE USA or THE US. The country is often known as America because of the name of the continent. America is the geographical name.

- The American flag is known as THE STARS AND STRIPES. It consists of Fifty stars which represent the fifty states. Thirteen red and white horizontal stripes stand for the original thirteen States that were united in 1776.
- The first flag was called the Grand Union Flag. It combined the flag of Great Britain with the thirteen stripes. It showed that these first thirteen states were British colonies. After the War of Independence, all thirteen states became free and the flag changed. The British flag in the corner was replaced by stars. Every time a new state entered the Union, a star was added.
- So now today's flag shows the thirteen stripes for the original number of states in 1776 plus the 50 stars which represent today's total.

- The symbol of the country is the **BALD-HEADED EAGLE** with its wings spread on a white background.
- Five thousand years ago the first Americans chose the eagle as the emblem to symbolize their power. The bald eagle owes its name to the early American colonists. It actually isn't really bald at all but white-headed. This bird lives only in the USA and Canada. In 1782, Congress selected the bald eagle as the emblem of the newly formed union to show the courage and might of the nation.
