Listening and Speaking

● p. 153 ex. 2

1. What did Cathy, Jessica and Brian want to be when they were children?
2. What jobs do they have now?

What can you do after school? Do you think you will be able to follow you

Reading

- *Saving Lives*

In certain circumstances, a doctor can mean the difference between life and death. Accident and violent crime victims and soldiers wounded on the battlefield know this because their lives depend on the skills of trauma surgeons. People who suffer critical injuries need a doctor to attend to them quickly because delaying treatment might simply mean death.

- *Extending Life*

Doctors are responsible for increased life expectancy and improved well-being in society. People who survive diseases such as cancer usually owe their survival to doctors, whose skills and dedication are vital for their cure. Modern medical technology coupled with doctors' care can give persons diagnosed with terminal illnesses hope of living longer.

- *Humanitarian Work*

Doctors perform humanitarian work in society. Some advocacy groups on health issues, such as hypertension and cancer, draw membership from the medical profession and help disseminate information about how to avoid so-called lifestyle diseases. Doctors may work as volunteers on missions ranging from providing care to disaster victims to training medical personnel in the developing world.

Mark the sentences as true, false or doesn't say.

T

- People can die if they do not visit the doctor in time.

F

- Doctors don't influence our life.

DS

- Some treatment cannot help.

T

- People can avoid lifestyle diseases.

DS

- All doctors are careful.

F

- Doctors work only for money.
