estates: large number of
houses designed and built
close together at the same time
– **жилой массив**

Types of houses

- **British people live in a variety of different types of houses. There are detached and semi-detached houses, terraced houses, flats, council houses and bungalows. Many people live in detached and semi-detached houses in the suburbs or in villages. British people who live in or near town centres, on the other hand, tend to live in terraced houses.**

- These houses are built in rows and are often close together and have few rooms. Many houses in British inner-city areas are **blocks of flats**. Some of these are homes to the wealthy; others are cheap **council flats**. British pensioners often live in **bungalows in the suburbs** or in **villages**. These are **homes** which have **no stairs**.
