

There are many professions in the world. For example: a designer, an architect, a lawyer, a doctor, a teacher and others. All of them are interesting and important.

I like professions of a doctor, a
veterinarian, a dentist.

When I grow up I would like to be a dentist. A doctor should be clever trustworthy, kind and hardworking.

to my mind I will be a good doctor. I
work at school hard. I am a
hardworking pupil. My favourite
subject is Biology.

I am sure a dentist is the most important profession because people always want to have a beautiful smile.
