# «Age Of Adaline»<sup>(2015)</sup>

The main character was born with the twentieth century and lived for a hundred years, but it never gets old. Despite his long life, Adaline was unable to find a loved one. But finally she meets a man who can once again become mortal and grow old with him.

# The plot

The film's genre - drama, romance with elements of fantasy. I don't like science fiction, but in this film element is very small and so expertly played and presented as scientific fact, I almost believed that this could be in reality. And it was on the cessation of aging, and the feeling that the heroine is not old not only in appearance but the soul, her daughter seemed to me much wiser, and generally it's a bit comical to see the young, even the young mum next to the already rather old daughter, who at the end of the film decided to introduce myself even her grandmother. The plot is fascinating, lengthy I would not have called, although the film lasts a little more than usual - almost two hours. The film was created with the participation of the two countries - the United States and Canada, the Director of this film is Lee Tolland Krieger, and the main female role is played by the hitherto unknown to me Blake lovely - very beautiful and interesting woman looking at it I would also like to note the work of stylists and make-up artists: she has several images, it is always spotless and looks nice. By the way one of the male roles played by Harrison Ford, which I found out because he had grey hair and a beard, with glasses. Very nice and bright film, with the first frame I was surprised by the views from the bridge, and in the course of the film in the woods, even on the road is a worthy camera work, long time since the spectators did not spoil these pictures. A very decent movie idea, in my opinion, has fully disclosed, very nice it was presented to the viewer, of course I recommend to watch.
