

Our health and society in future

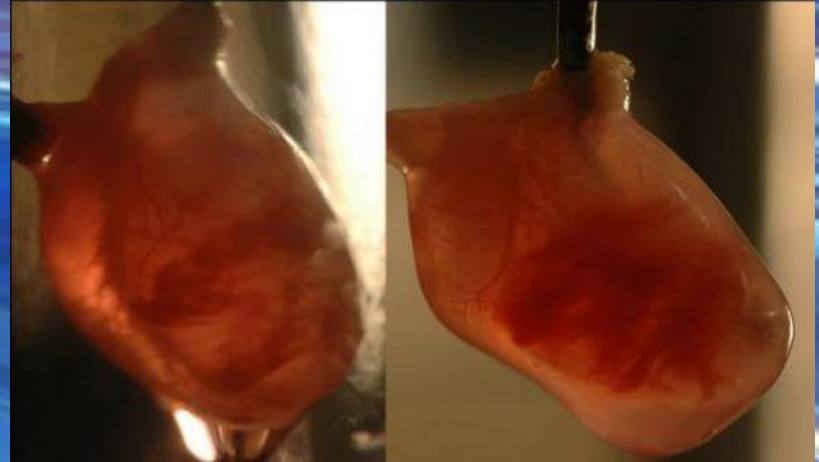

Larina Elena did this work

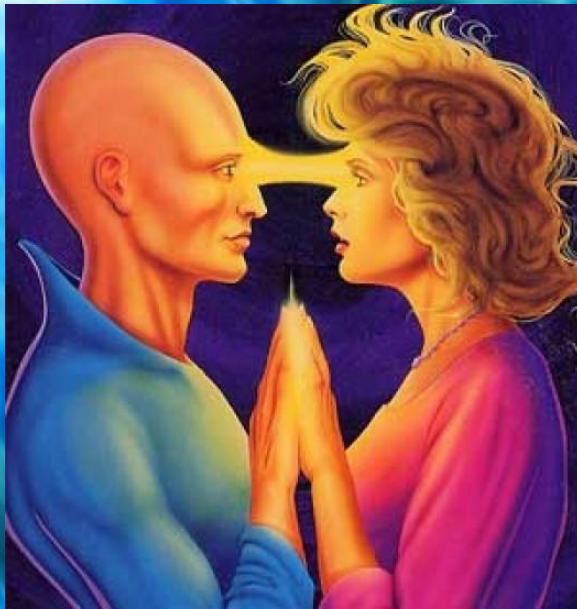

A new type of contact lenses —
they will be able to access the
Internet.

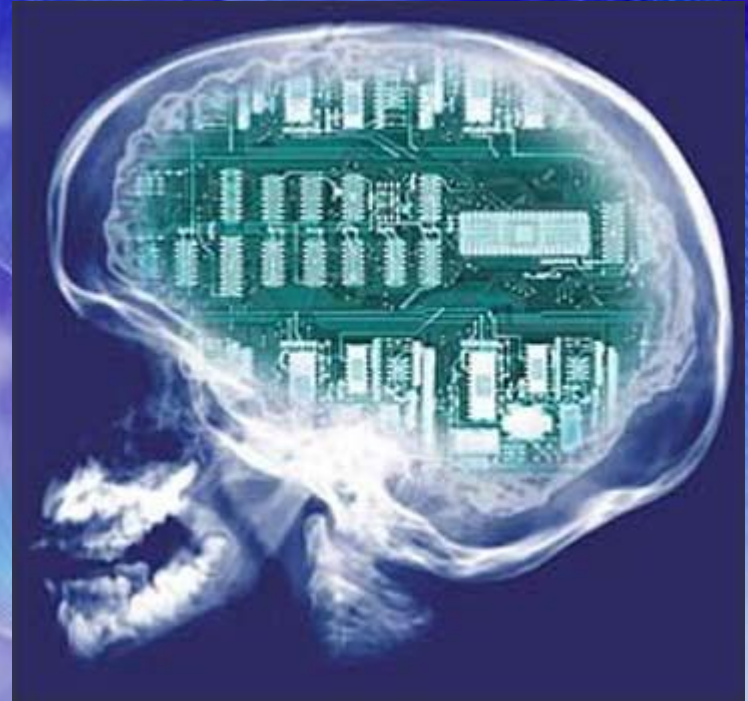

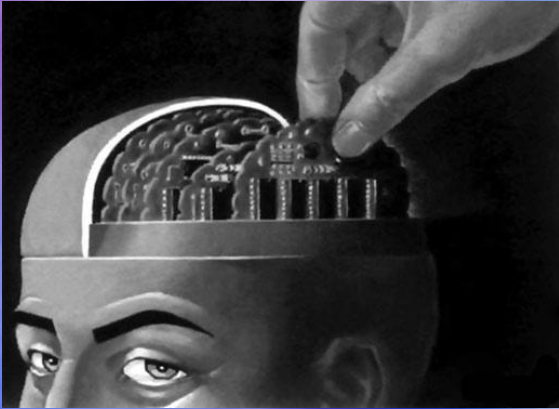

In the free market should appear in various "spare parts" for human organisms.

In 20 years society will possess the capabilities of telepathy

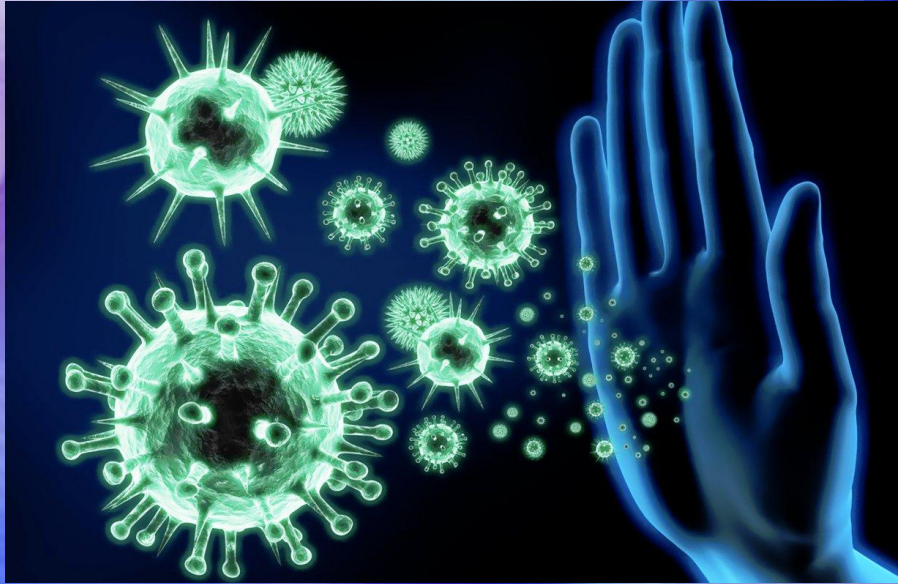

Scientists will be able to implant in the brain paralyzed special chips with which they can just using the power of thought to control computers, write emails, play video games and use web browsers.

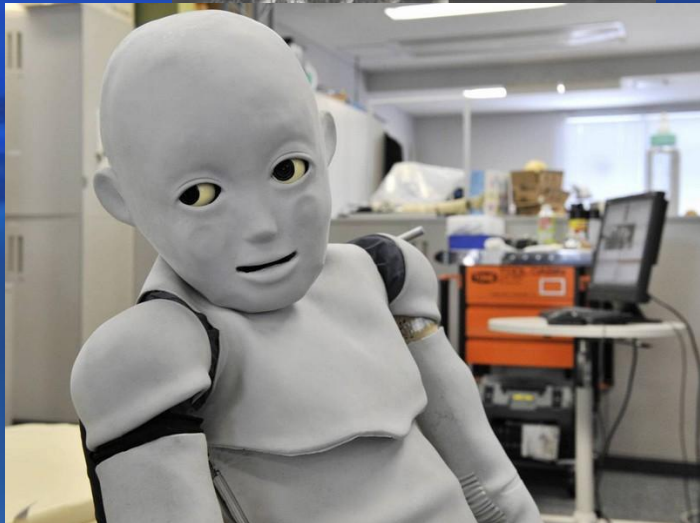

Scientists will develop the technology that will allow in the future to slow down our aging.

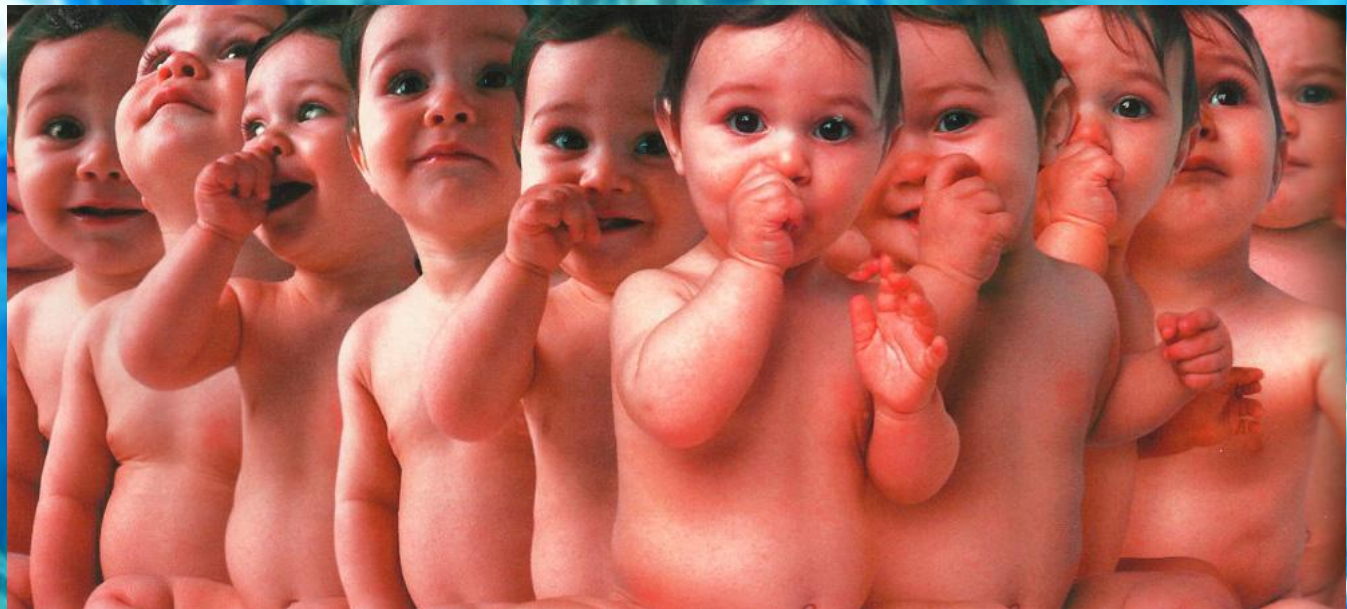

About a hundred years, humanity finally beat the cancer.

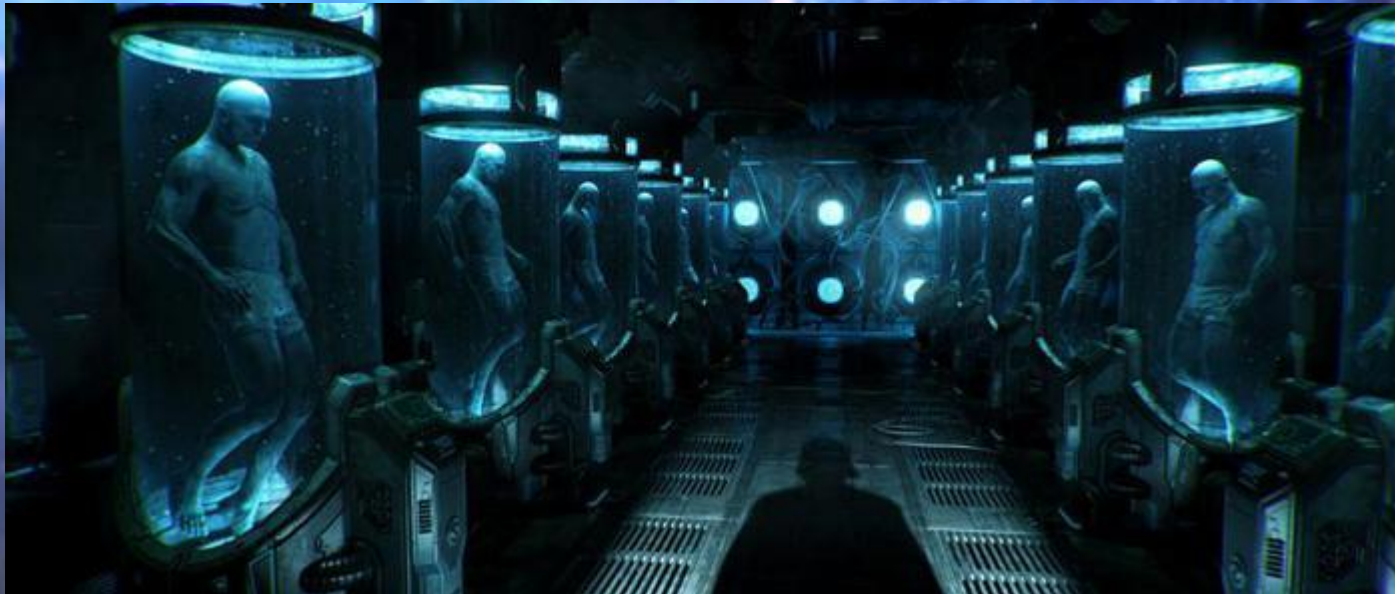

And all around us everywhere are intelligent humanoid robots.

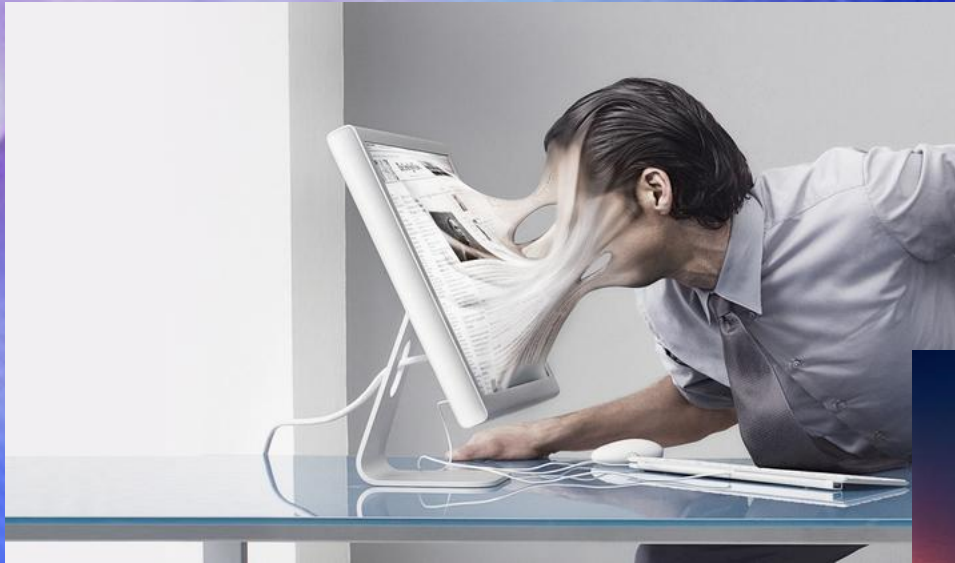

Will be made of successful human cloning

Children will be born either as a result of artificial fertilization and hatching or cloning.

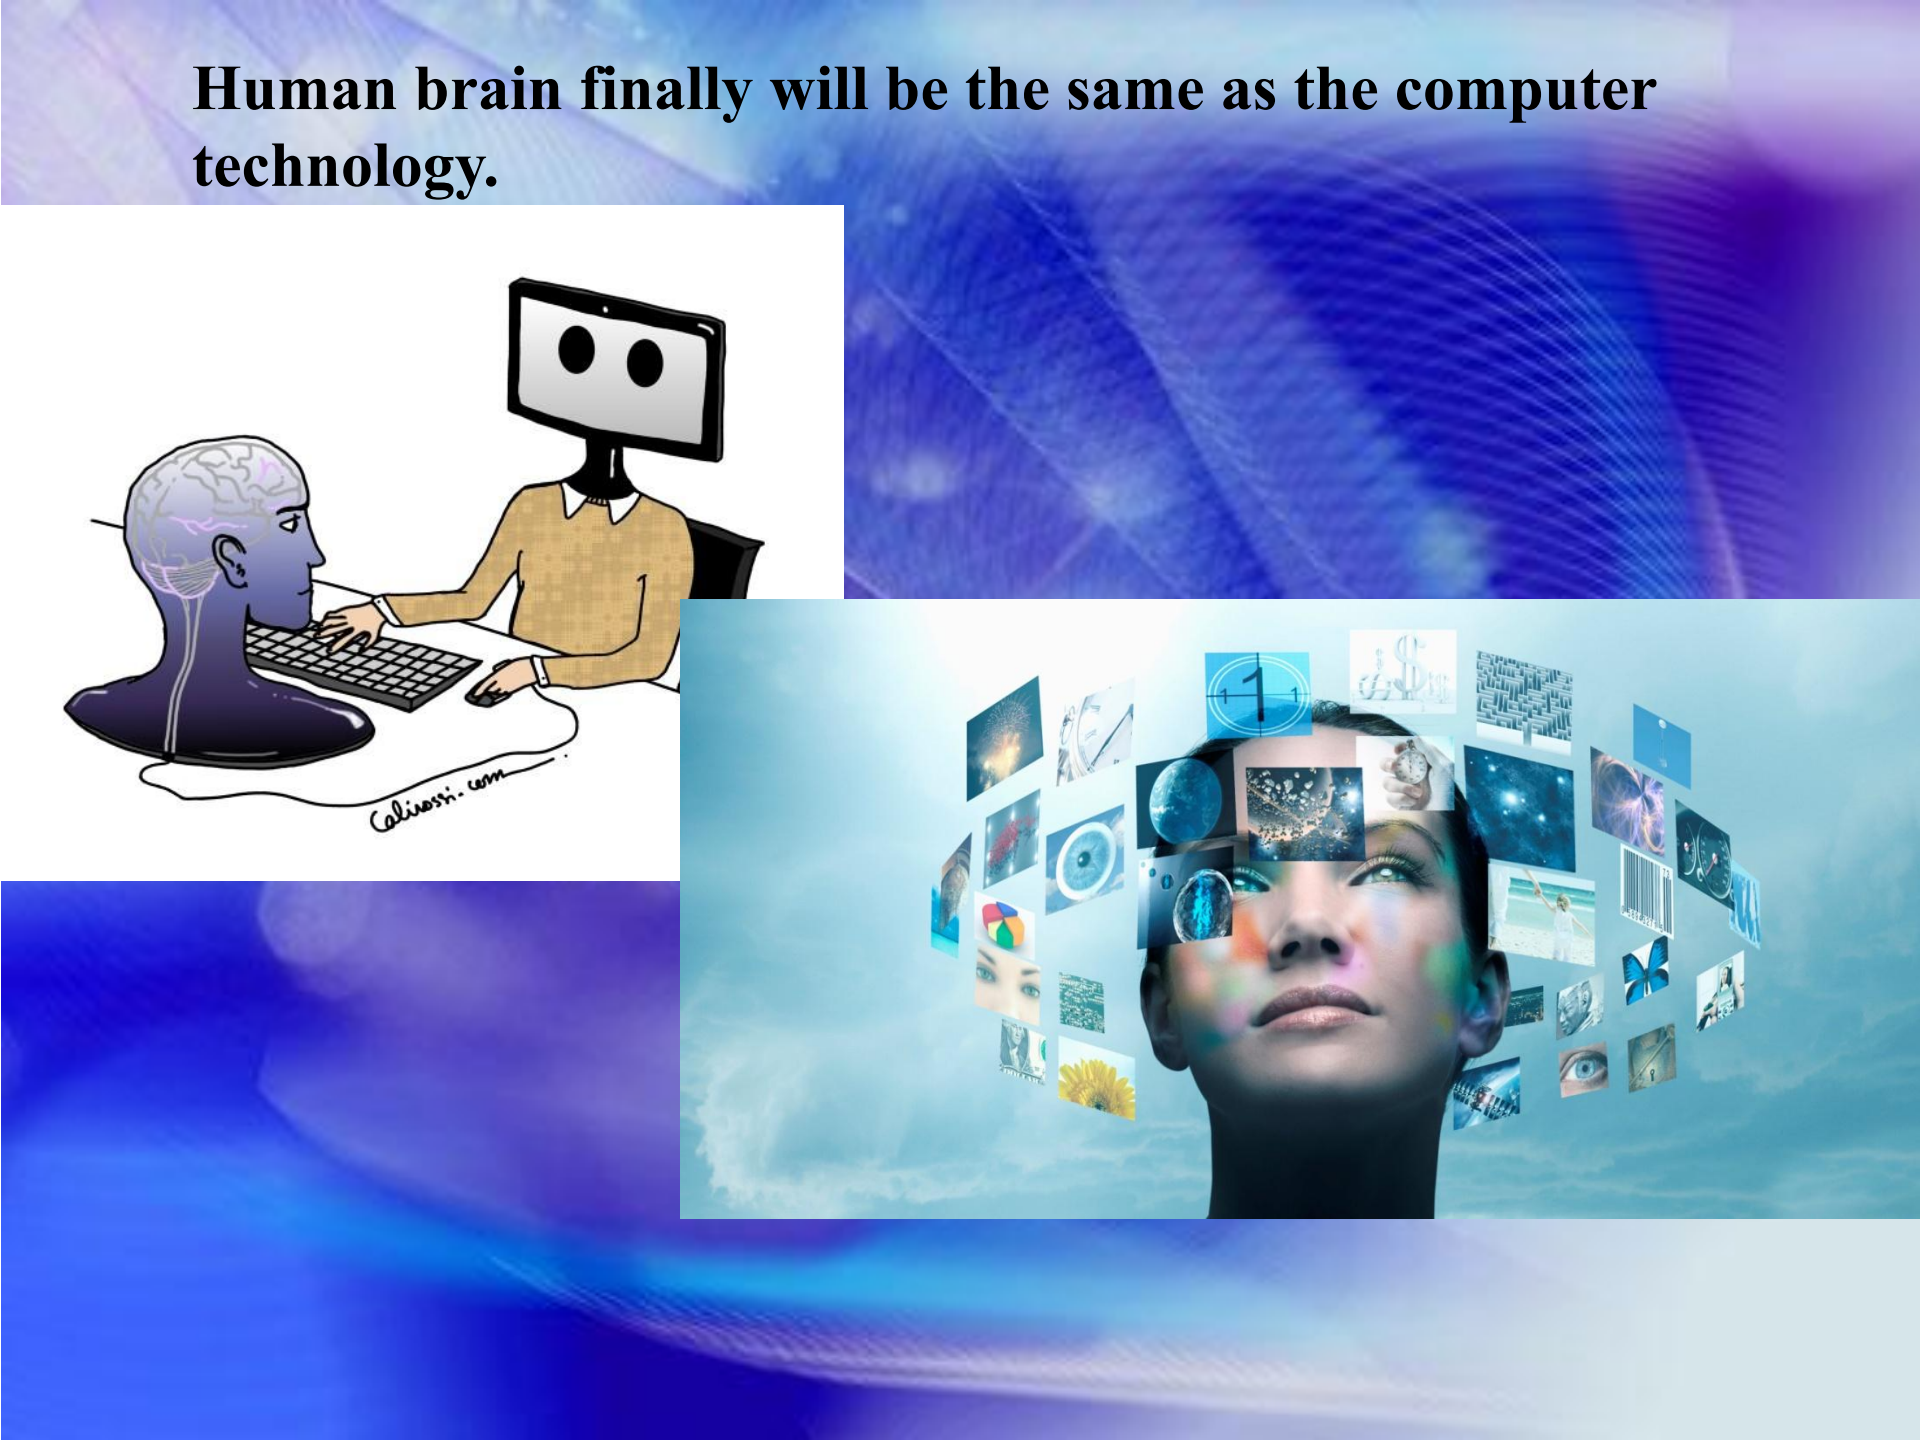

Will happen to the global epidemic of mental illness, especially spread of a new kind of madness – people will imagine themselves to be afraid of computers computer viruses.

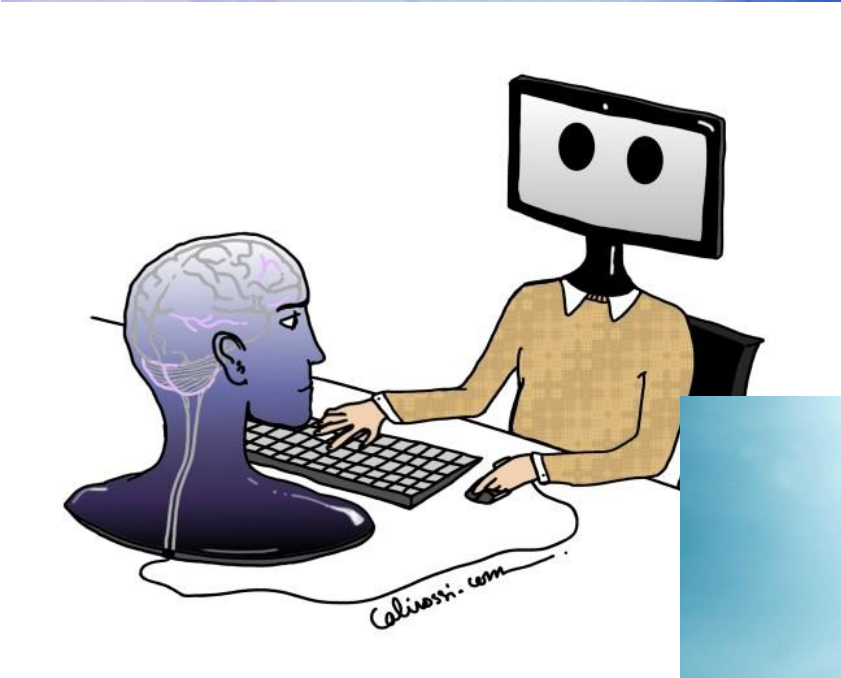

**In 2075 the world will be on the verge of
immortality.**

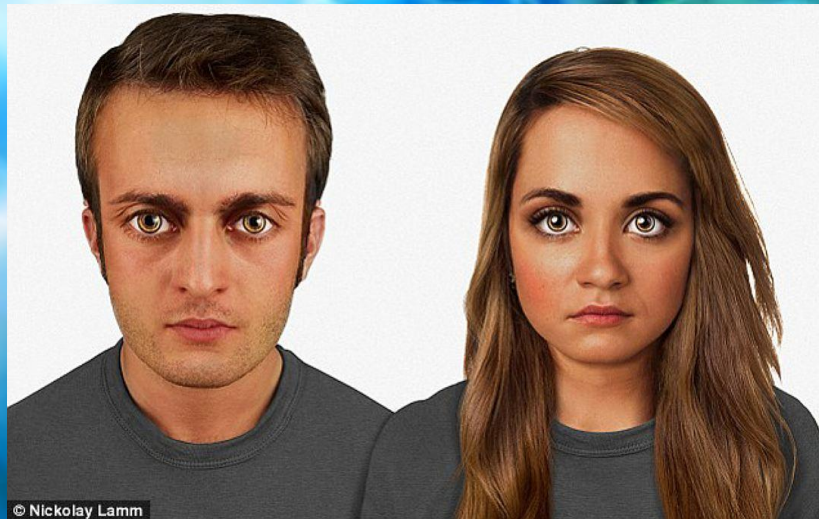

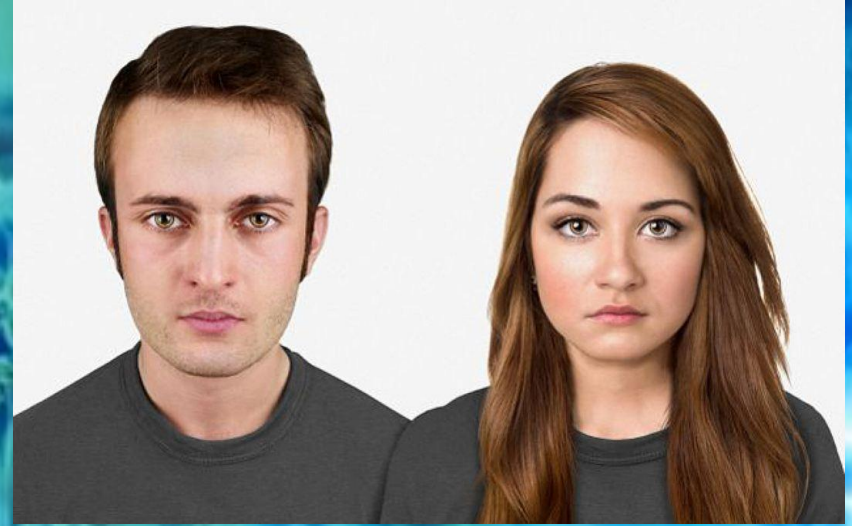

Human brain finally will be the same as the computer technology.

The image is a collage illustrating the concept of human-computer integration. The top left features a cartoon illustration of a person with a computer monitor for a head, sitting at a desk with a keyboard and mouse. The bottom left shows a human brain with circuitry, symbolizing neural technology. The right side of the image shows a woman's face looking upwards, surrounded by various floating digital icons and images, including a clock, a dollar sign, a globe, and a butterfly, representing the flow of information and data. The background is a blue and purple abstract pattern.

And researcher Nikolay Lamm predicted how to change a human face - specifically the face - for the tens of thousands of years.

And another point of view by Anatomist Chris Stringer

National borders will be erased not only from the maps, but from human memory

Personal life is inseparable from the career, and people will first of all honor his Corporation

The globalization of the economy will allow to get rich
unprecedented number of people.

At the same time, two thirds of the Earth's population will lack fresh water.

By this time America will make technological leap, getting rid of oil dependency

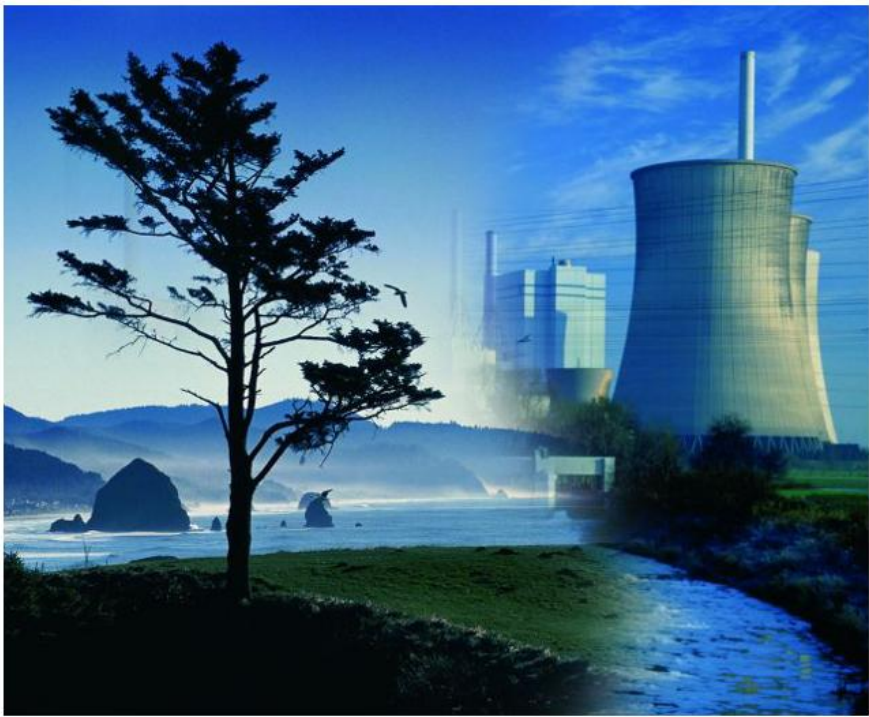

Russia, meanwhile, will join the Alliance with Iran and China and will press the European Union and Eastern and Central Europe.

After 2041 will no longer apply a ban on exploration activities in Antarctica, the largest country in the world to rush to mine the minerals.

The environment will become the basis for political, economic and military relations between the countries.

The world population will be 9-10 billion people.

Very distant future.....

At the moment it is known about the Universe that it is expanding. Prediction Danny Hillis, American inventor, is not supported by any scientific evidence, but based solely on intuition and affinity for beautiful solutions is this: sooner or later, the universe will again be compressed. In any case, to test this prediction is likely no one – it is unlikely that our civilization will last that long.
