

My ideal place to live

In my opinion Spain is the ideal place in the world.

It's the country of the brightest sun, the clearest waters of the Atlantic ocean.

**Spain is the only place in the world where palm trees grow.**

I would like to live in one of the ancient cities like Madrid or Barcelona.

Spaniards are beautiful, cheerful and friendly people.

I like Spanish carnivals, traditional music and dances.

Every part of this country is different from other parts.
