

ECO VILLAGE

A white, arched sign with horizontal lines is mounted on black poles. The sign features the word "ECO VILLAGE" in green, 3D block letters. A green leaf logo is positioned between the "O" and "V". The background is a dense forest of tall, thin trees with green foliage. The sign is slightly tilted upwards.

My plan:

- Title page
 - Plan
 - Reason
 - Definition
- More detailed

Why eco-villages?

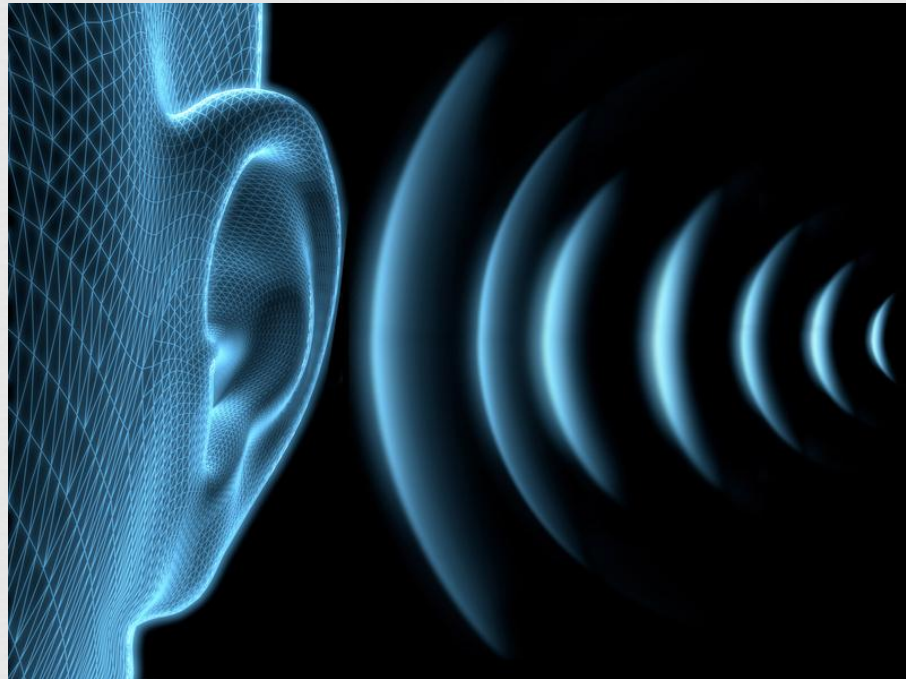

In the city:
1. Air pollution.

Why eco-villages?

In the city:
2. Noise pollution

Why eco-villages?

In the city:

3. Dangerous chemicals in food.

Definition

The ecological village is a community situated in eco-friendly living space.

More detailed about this

- Eco-villages are designed by local people.
- Eco-villagers are united by shared values.

More detailed about this

- ❑ The human is a part of nature, not it's master.
- ❑ Constant full development of a person.
- ❑ Common interests. stability.

The sources of information

- <https://en.wikipedia.org/wiki/Ecovillage/>
- <https://yandex.ru/images/>
- <http://ecology.md/>

An aerial photograph of a river meandering through a dense, vibrant green forest. The river's path is highly irregular, forming several sharp loops and oxbow-like shapes. The surrounding land is covered in thick, healthy trees, with some areas showing lighter green foliage, possibly indicating new growth or different tree species. The lighting suggests a bright, sunny day, with the sun casting soft shadows and highlighting the textures of the forest canopy and the water's surface. The overall scene is one of a pristine, natural landscape.
