

# Charles Darwin

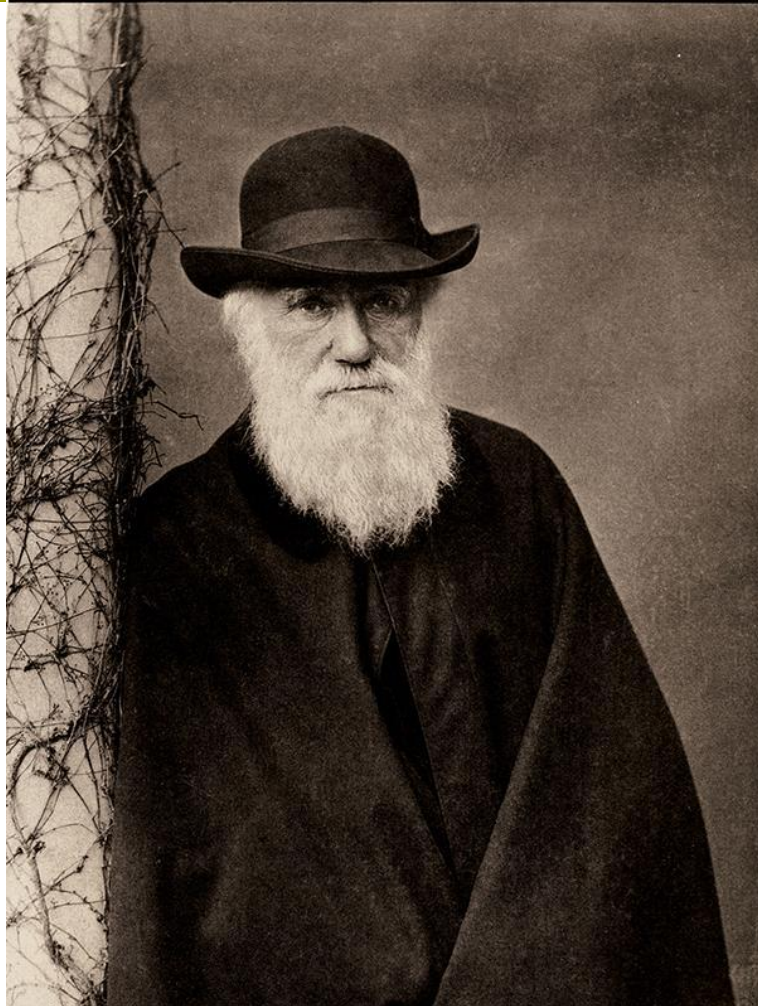

---

# Charles Robert Darwin

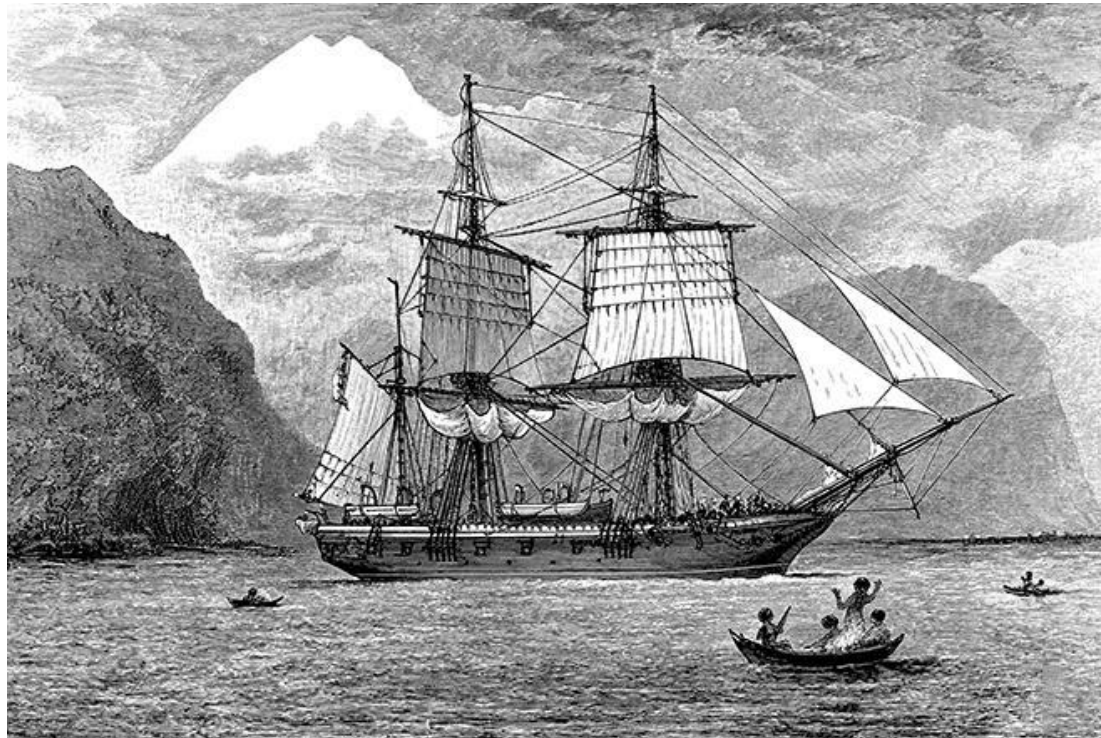

12 February 1809 – 19 April 1882

---

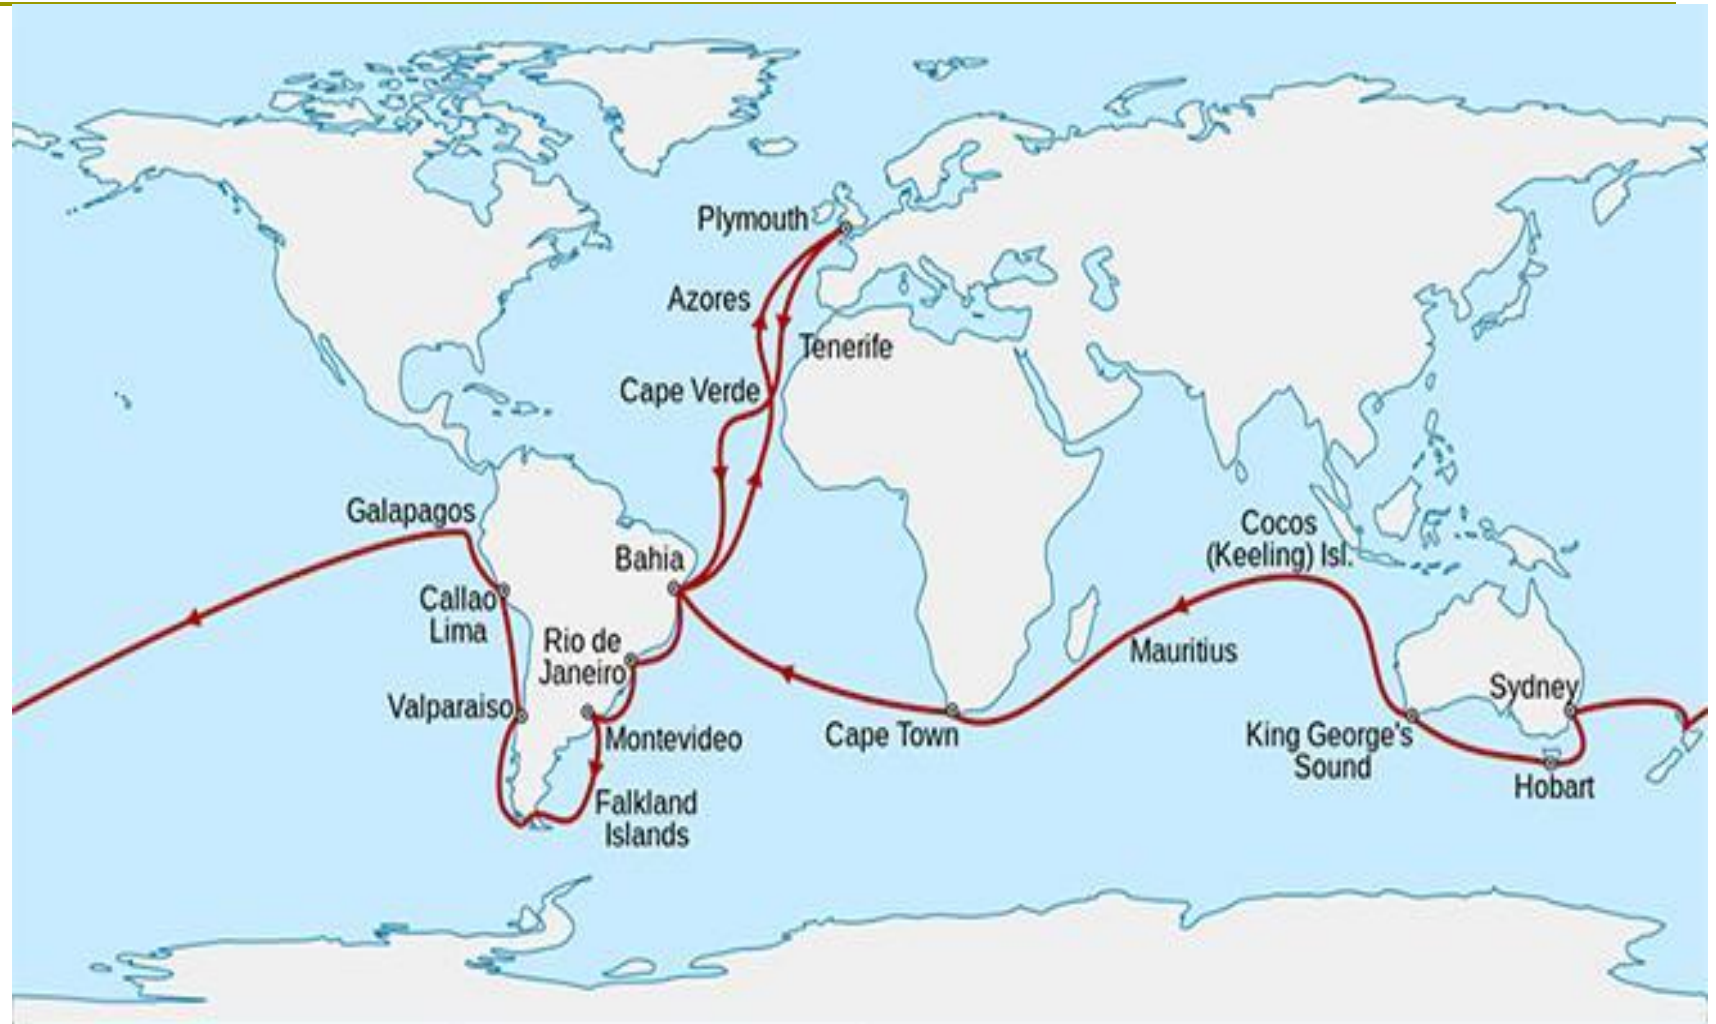

- Darwin was the British naturalist who became famous for his theories of evolution and natural selection.

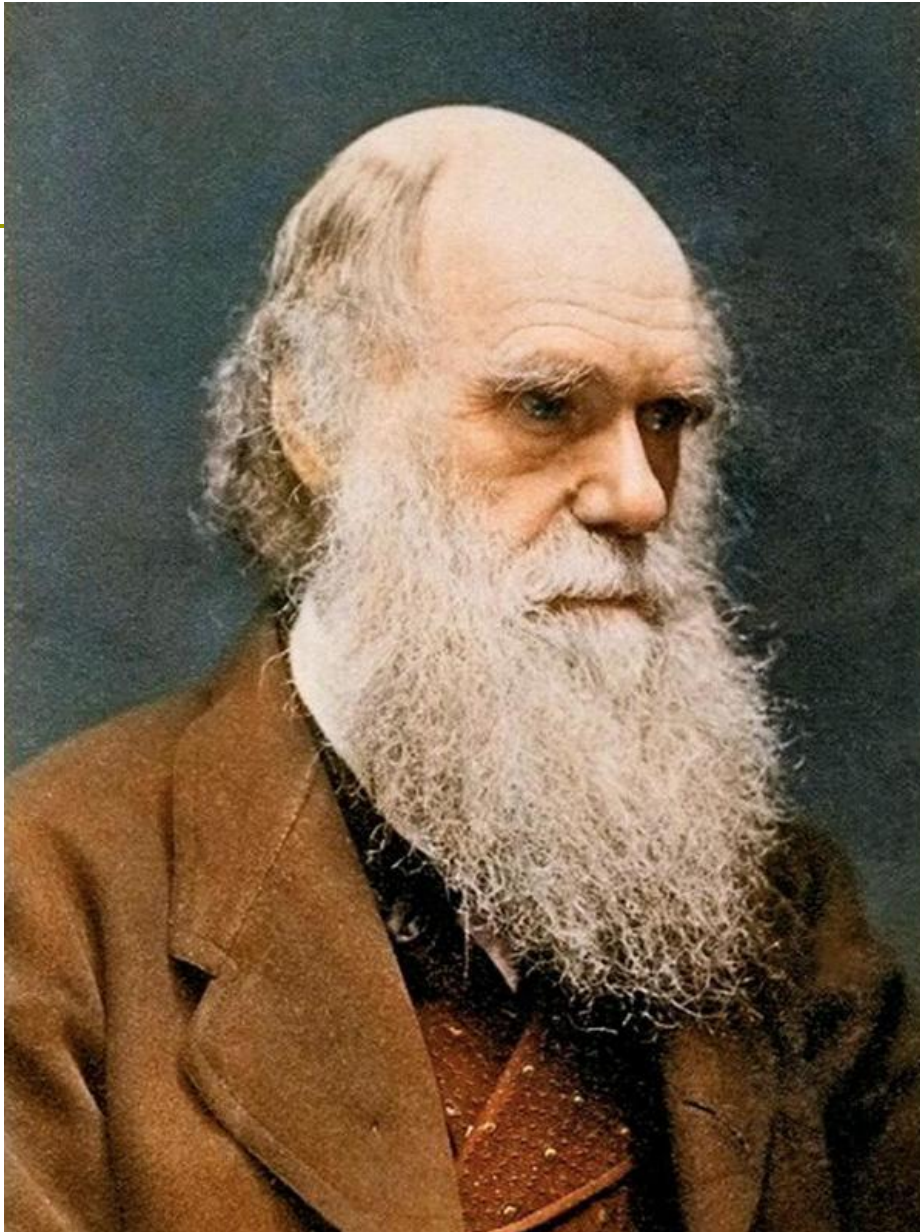

- This trip is a very important one in the history of science, for it led Darwin to write one of the worlds most famous books. The book is "The Origin of Species".

# The voyage of the *Beagle*, 1831–1836

- The idea that all the plants and animals of today came from the simple plants and animals of long ago is called "The theory of evolution"
