

The background of the image is a soft, out-of-focus yellow with numerous small, bright white and yellow bokeh spots, creating a warm, sunlit atmosphere. Scattered across the frame are several pink cosmos flowers. Some are in sharp focus, showing their delicate petals and dark brown centers, while others are blurred, blending into the background. The flowers are primarily located on the left and right sides, framing the central text.

Life on a small village in Tuganbai

The village Tuganbai was discovered in 1929. The village is a source of culture and human life.

One of the most important monuments of architecture is Tuganbai . It is situated in Centre of our village. The beautiful building of the mosque attracts people its beautiful ornaments in minaret

In this year we have  
So many surprises first of all I  
can say with that we celebrate  
the opening of new restaurant  
and cafe for celebrate  
Different holidays

Silk way railroad it's our silk road.  
In the past, the silk road was an  
important trade rout as like as  
today this tour travels west along  
the silk road from Zhetigen...

We have factory which  
Called Amiran factory ensuring  
With dairy products Amiran imported  
Canadian dairy farm is the breeding of dairy  
cows and dairy farms that supply other milks  
a variety of kefir dairy farm gradually start  
production of the farm and it has become  
increasingly popular in a variety of smart  
phones.

The water lives valuable fish in the  
Tyganbai

Slimmer this monument to the heroes of World War II and that we remember their heroes . They fought for their country and gave their lives in order that we would live in peace and freedom we want people to remember about heroes and proud of them

She clinic where a lot of great assistance to our village lands. There are a lot of young professionals in the clinic. clinic was founded in 2007. hospital inside a very large, clean, dentist, where he works as a therapist ambulance staff.

we have a department where we have a bunch of different services from which we make a payment of water using light other things. and letters from distant lands from which we can read a variety of newspapers and magazines of interest

What would I wish for the young people of my motherland.  
Develop in yourself restraint and patience. Never funk the hard jobs in science.  
Study, compare, accumulate facts...  
But when studying , experimenting, and observing, do your best to get beneath the  
laws governing them.

At first why I chose this theme? I chose it because I want to develop my village . Pupil's knowledge and I want to open new observation factories and find new medicals for domestic animals to improve their health and increase dairy products

**Thank you for your  
attention!!!**
