

# Conflict

Anastasia Tsyba 9 «V»

# What is conflict?

- The conflict - a quarrel or clash of different views of people and their interests.

# Why conflicts is happen?

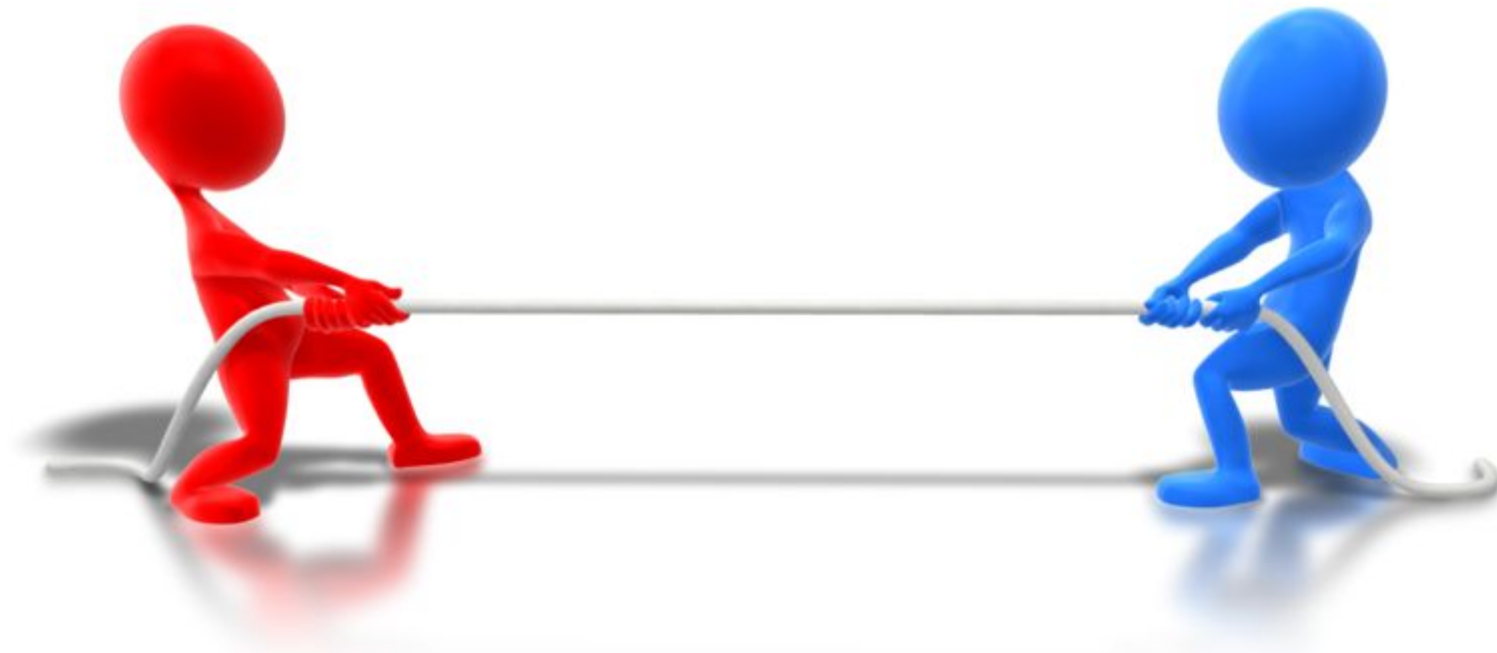

- Conflicts happen because people are different: they want different things, they have different ideas and their values are different.

- Very often people have conflicts because do not listen to each other well.

- ▶ People think about what they want to say, and did not really hear what the other person is saying.

- Conflicts happen because people don't respect each other. People don't get on well each other.

- ▶ Because some people are rich and industrious / some are poor and lazy. People do not observe the laws of co-existence.

Thanks for watching.
