

The Tongue - Twister

***Three grey geese in the
green grass grazing,
Grey were the geese and
green was the crazy.***

A scenic landscape featuring a dramatic sky with large, dark clouds illuminated from below by a low sun, creating a golden glow. In the middle ground, a dense line of trees with green and some autumn-colored foliage stands behind a simple metal fence. The foreground shows a paved area. The overall mood is serene and natural.

5. insect
6. earthquake

7. extinct
8. air
9. consumption
10. alive
11. human
12. floods

Environmental protection.

The poisoning of the world's land, **air** (8) and water is the fastest-spreading **disease** (4) of civilisation. It, like wars, **earthquakes** (6) and **floods** (12), is one of history's greatest dangers to **human** (11) life on earth.

Overpopulation, pollution and energy **consumption** (9) have created such planet-wide problems as acid **rains** (1) and the global warming.

The seas are in danger. They are filled with poison: industrial and nuclear **waste** (2). Every ten minutes one kind of animal, plant or **insect** (5) dies out for ever. If nothing is done about it, one million species that are **alive** (10) today will have become **extinct** (7) twenty years from now.

Air **pollution** (3) is also a very serious problem.

The End !
