FBI

Pavlova Irina

- The FBI handles different investigations for the Department of Justice.

- The FBI consists of various divisions such as:
Special Investigation Division, Identification Division, Laboratory Division, Training Division, Administrative Division and some others.

- The FBI works with state and local enforcement agencies.

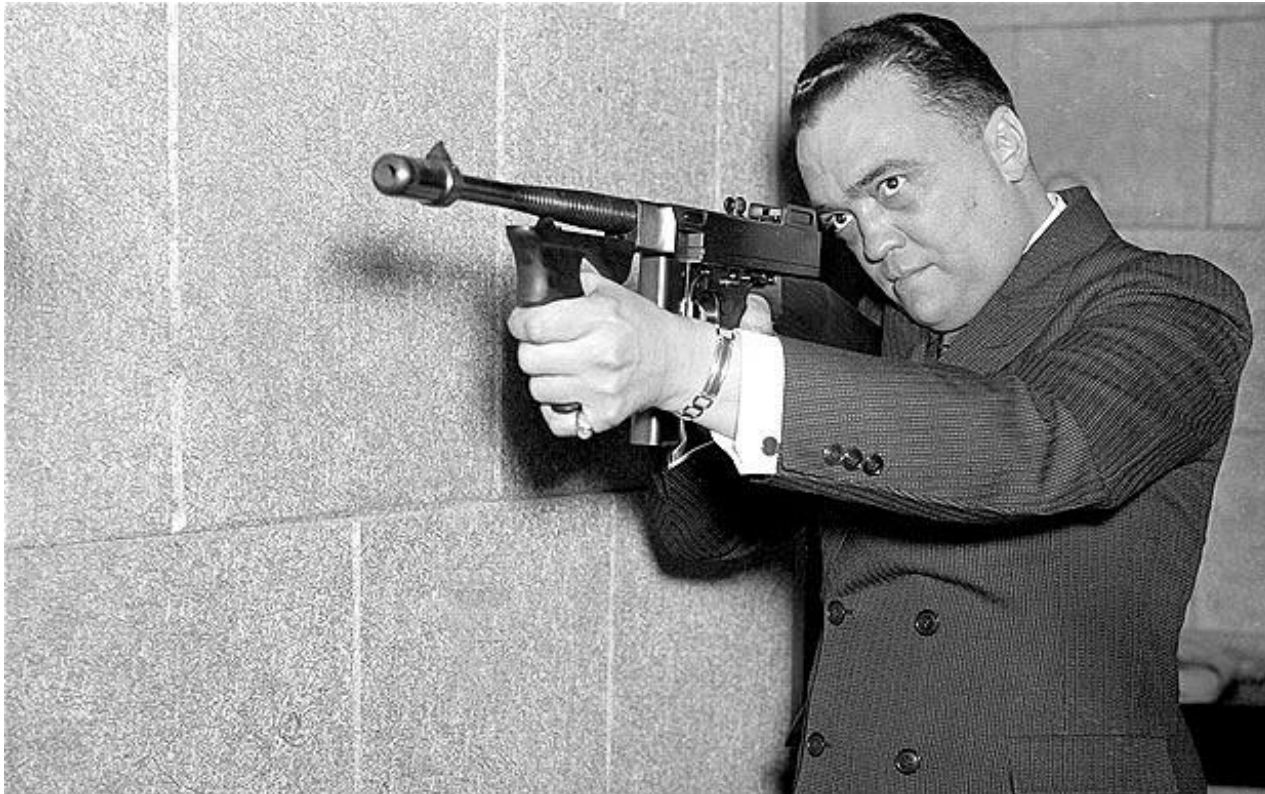

- FBI agents fight against organized crime, locate and apprehend escaped prisoners.

- The Identification Division was founded in 1924 by Director Hoover.

- The FBI Laboratory is the largest criminological laboratory in the world.

- The Identification Division has the largest collection of fingerprints in the world.

- The FBI agents are trained in Washington DC, and at the FBI Academy in Virginia.

- They study law enforcement sciences, firearms and some practical skills and techniques demanded by day-to-day investigations.
