Domestic and wild animals.

My favourite animal.

The African elephants

Urgency (актуальность)

The African elephants
are endangered
today.

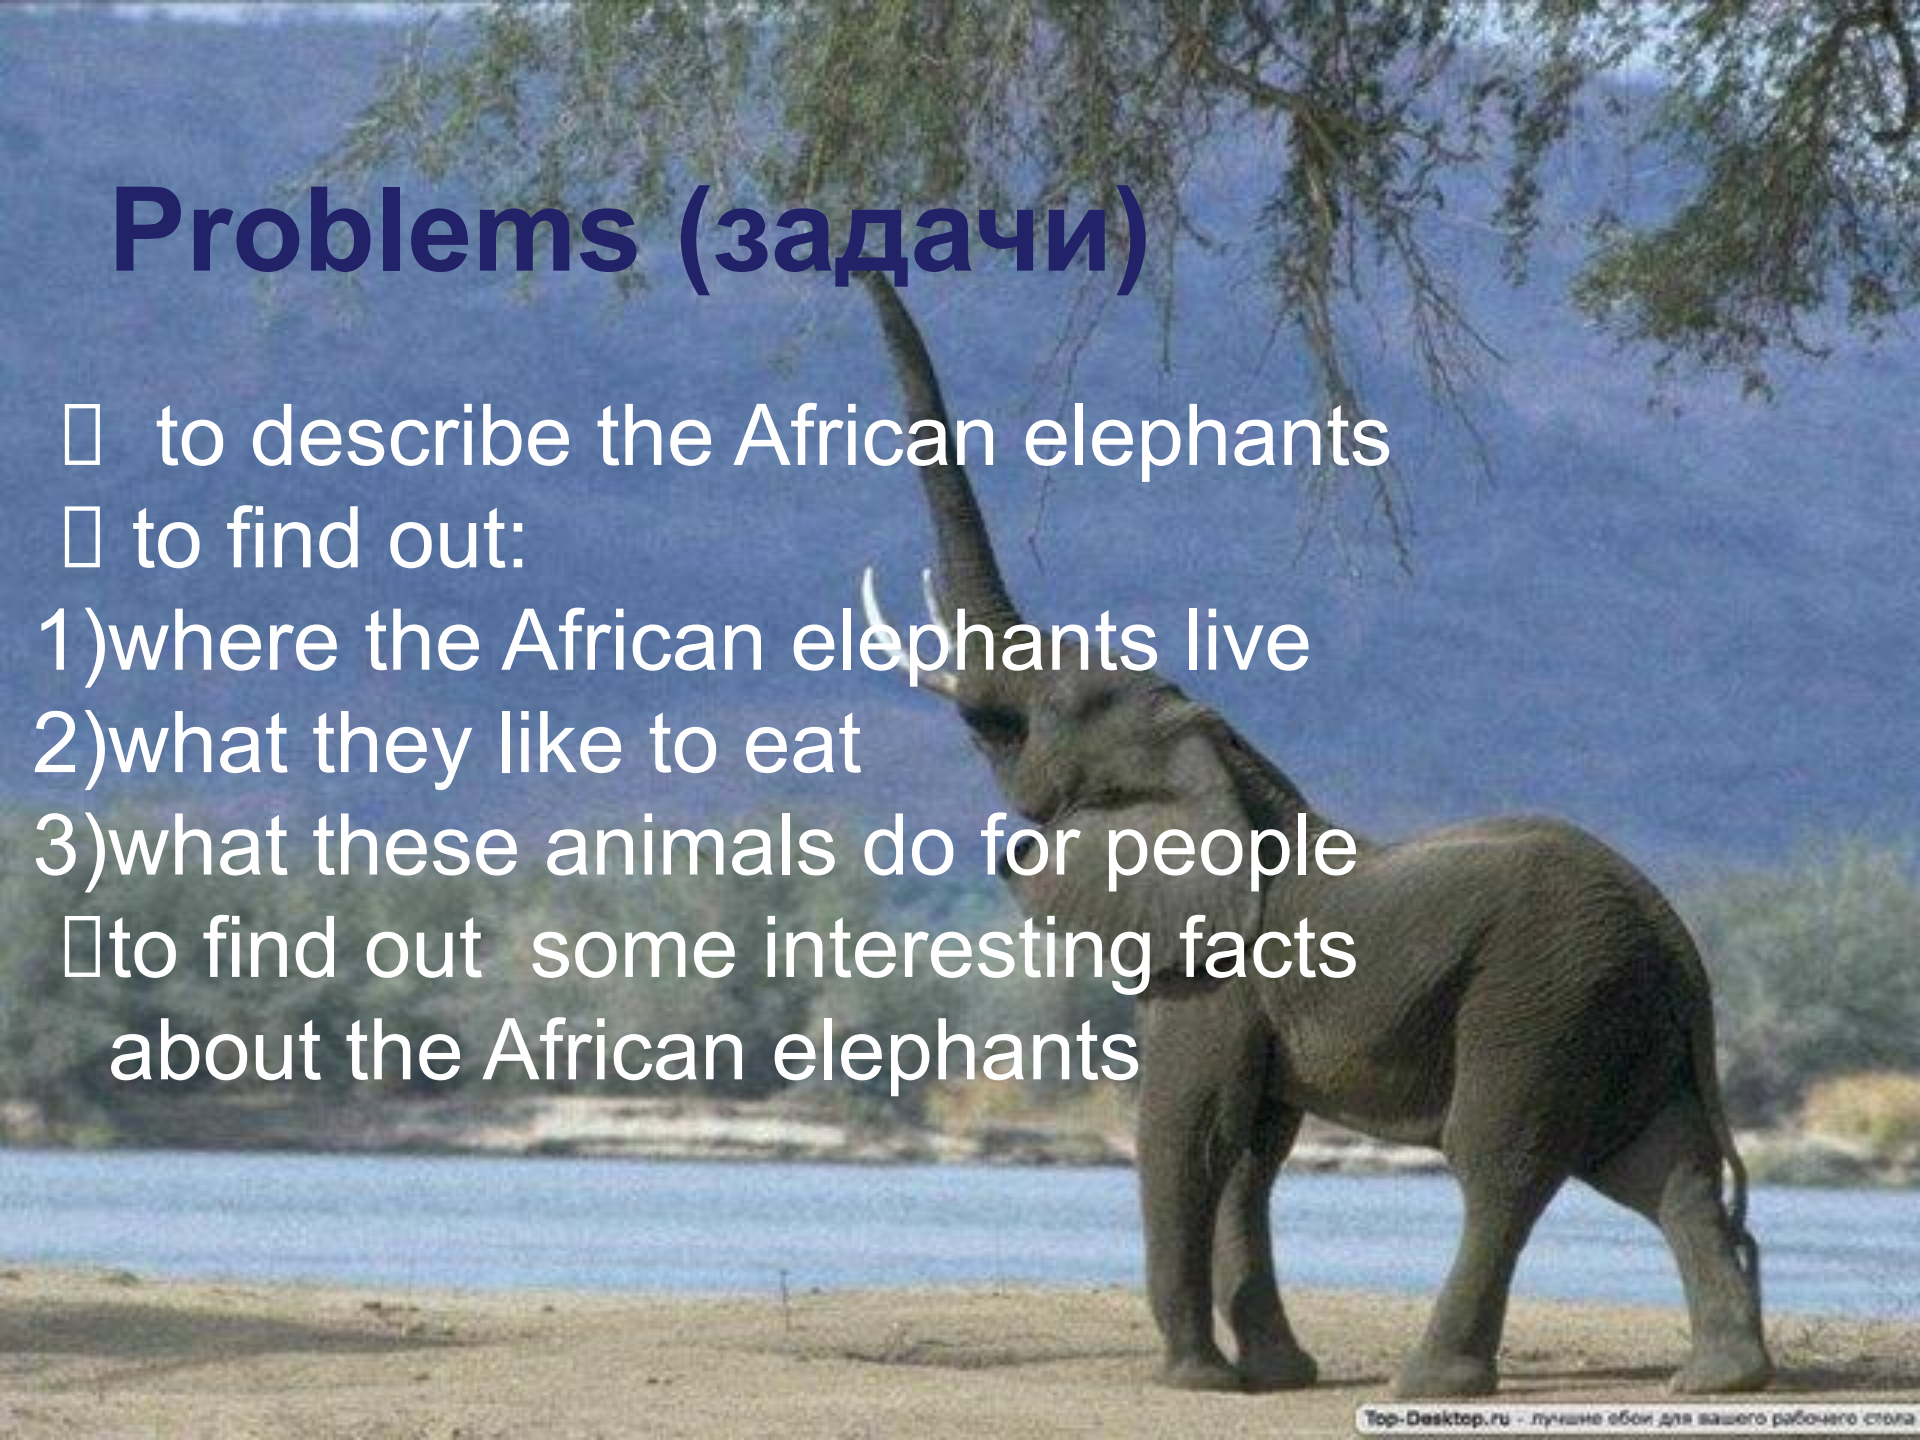

A large African elephant with prominent, curved tusks stands in a savanna landscape. The elephant is facing left, with its trunk slightly raised. The background shows a clear blue sky with some clouds and a horizon line with distant trees. The ground is covered in dry grass and some green shrubs. A small white bird is visible in the bottom left corner.

The object (цель)

**to study
the African elephants**

Problems (задачи)

- to describe the African elephants
- to find out:
 - 1) where the African elephants live
 - 2) what they like to eat
 - 3) what these animals do for people
- to find out some interesting facts about the African elephants

The African elephants are the biggest animals in the world.

The African elephants have got very big ears. They wave their ears when it is very hot.

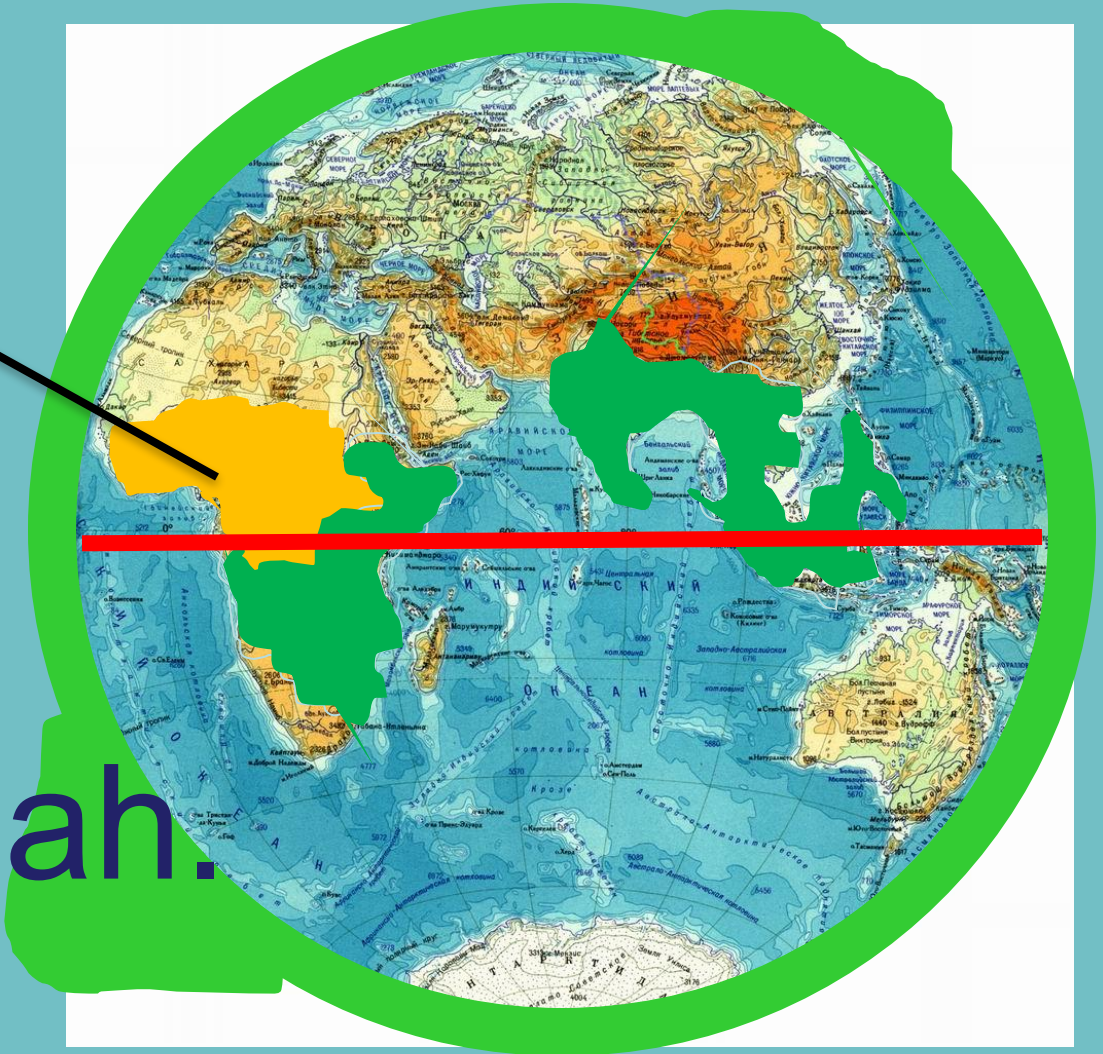

The African elephants
live 60-70 years.

The African elephants live

savannah

in Africa,
in savannah.

The African elephants eat
grass and leaves.

The African elephants carry things and people.

The African elephants can
run and swim.

The African elephants have got
a very good memory.

The African elephants are
afraid of bees.

Today people hunt these big and beautiful animals.

Conclusions (выводы):

- 
1. the elephants are weaker than they seem,
 2. they need our help,
 3. people must save the elephants.

The 30th of November is
the world day of elephants
