

Can we save ourselves?

Water saving

We must not waste a lot of water. Efficient use of water will help to save resources.

Change your car on bicycle

Cars make a lot of toxic substances and spend oxygen for working of engine. Using of bicycle can make air clearer and make you stronger

No plastic packages

We should use paper or fabric packages. Plastic packages don't decompose and some animals eat them and die

We can and must save our
planet because it's our home

Thank you for your attention
