A satellite image of Australia, showing the continent's diverse terrain. The interior is mostly arid and brown, while the coastal regions are greener. The surrounding oceans are dark blue. The text is overlaid on the central part of the continent.

Australia is situated in the south-west of the Pacific Ocean. The area of this country has got 7,687,000 square kilometers. Australia is the largest island in the world and it is the smallest continent.

**Nearly 20 million people live in Australia.
The official language is English.**

The capital of the country is Canberra.

The climate

Australia's climate is dry and warm. Australia is situated in the southern hemisphere and that's why there is summer, when we have winter and there is winter, when we have summer. It is interesting to know that January is the hottest month in Australia.

The animals in Australia have a lot of
original,

koala

and they are

interesting, for example...

kangaroos

crocodile

lizard

Melbourn

Formerly the head of the state is the Queen, but in fact Australia is independent, self-governing state. The Parliament consists two Houses.

The End
