What friendship is?

Friendship is a relationship between people who hold mutual affection for each other. The main distinctive features of friendship are confidence and patience. Real friends will never give up, they always help each other with their problems and share many secrets.

I don't need to have lots of friends, I think that one person should have only about 1 or 2 best friends and also have good relations with other people.

Lena

We have been friends with her for already 6 years! She is my best friend and I love her very much. I hope that our friendship will never end 😊

Kristina

Kristina is my first cousin. She is a very funny, crazy girl, I like to spend time with her and I love her

These are cool girls Ksusha And Arina

These are my classmates 😊

I'd like to say that friendship means a lot to me. My friends take a huge part of my life and I do my best to strengthen our relationship.

The end 😊
