

<u>General characteristics</u>

As any other part of speech, the noun can be characterized by <u>three</u> <u>criteria</u>:

- ♦ <u>Semantic</u> (the meaning)
- Morphological (the form and grammatical categories)
- <u>Syntactical</u> (functions, distribution)

Semantic features of the noun

According to different principles of classification nouns fall into several subclasses:

- According to the type of nomination they may be <u>proper</u> and <u>common</u>
- According to the form of existence they may be <u>animate</u> and <u>inanimate</u>. Animate nouns in their turn fall into human and non-human
- According to their quantitative structure nouns can be <u>countable</u> and <u>uncountable</u>

<u>Morphological features of the noun</u>

In accordance with the morphological structure of the stems all nouns can be classified into:

- <u>Simple, derived</u> (stem + affix, affix + stem- happiness)
- <u>Compound</u> (stem + stem- armchair)
- ♦ <u>Composite</u> (the Hague)

Morphological categories

The noun has morphological categories of:

 <u>Gender</u> (some scholars admit the existence of that category, but not all)

Syntactic features of the noun

- The noun can be used in the sentence in all <u>syntactic</u> <u>functions</u> but predicate.
- What about <u>noun combinability</u>, we can say that it can go into right-hand and left-hand connections with practically all parts of speech.
- So practically all parts of speech but the verb can act as <u>noun determiners</u>. However, the most common noun determiners are considered to be <u>articles</u>, <u>pronouns</u>, <u>numerals</u>, <u>adjectives</u> and <u>nouns themselves</u> in the common and genitive case.
