About myself

Hello. My name is Oksana, I am a person with different hobbies. I have a cat and some fish of which I like to take care. I have a lot of friends with whom I like to spend much time. I have my beloved parents who help me to realize my dreams. They buy everything for my playing music, drawing. Daddy helps me to master the guitar, mum has learnt me to knit. I have an uncle whose name is Ivan who helps me to understand computers, my grandmothers have learnt me to embroider . These works decorate walls of our apartment. But my most important assistant is patience...

I have two cousins in Kurgan whom I often visit and love very much. I have my most loved little niece, it the daughter of one of my cousins (we are in the photo), I like to play with her very much.

My hobbies

WEB-DESIGN & "PHOTOSHOP"

Some of my works in Photoshop:

One of my favorite hobbies is web design and Photoshop. I love to spend time in the wilds of the Internet, constantly creating and editing its sites and forums. I love to experiment with colors, structure and so on. I like sitting for hours in photoshop creating and editing icons, smiles, banners, epigraphs, avatars, wallpapers, pictures and much more for the forums. I find this the most favorite of all ...

INTERNET

Internet is a physical basis for the World Wide Web. Often referred to as the Global Network, or simply network. It is a union of autonomous chaotic systems, that does not guarantee the quality of communication, but provides good stability and independence of the system as a whole from the performance of any of its plot.

At the present time, when the word "Internet" is used in everyday life, most often refers to the World Wide Web and accessible information in it, not on its physical network.

World Wide Web along with personal computers form the technological basis for the development of the international concept of "World Information Society".

Since 2008 almost all secondary schools in Russia have been equipped with computers, with Internet access and basic software packages for teaching computer science, working with personal computers and the Internet.

Sample graphical representation of connections between networks Internet. Depicted only connection between the servers.

For me the Internet is passion, work and resources.

In fact I'm constantly working on sites and forums helping to make the appropriate style (design) or edit (change or create icons, images, etc.).

Passion is the opposite, I love RPG communicate, to sit on the forums discussing my favorite topics, reading manga or watching anime online. It also gives me pleasure just to search anything for leisure: schemes for embroidery, images, videos and somewhat.

Internet also gives me a lot of different resources. For example: various articles on my favorite topics, information for reports for school, something new about music, movies, books, and much more.

But most of all Internet for me is a way to communicate with friends. I have many friends who live far away and it is difficult to visit them. But the distance for us does not mean anything if we can communicate and these thoughts give not only positive emotions but hope for a meeting ...

COMPUTERS

The word **computer** is derived from English words to compute, computer, which is translated as "calculating", "computer" (the English word, in turn, comes from the Latin computo - «compute»). Originally, in English the word means an individual generating arithmetic involving or without the involvement of mechanical devices. In the future its value will be postponed to the machinery itself, but modern computers perform many tasks not connected directly to mathematics.

New interpretation of the word computer appeared in 1897 in the Oxford English Dictionary. Its drafters were then understood as a mechanical computing device. In 1946, the dictionary additions added the meaning of digital analog and electronic computer.

Computers and programming is still one of my enthusiasm. I love programming and everything related to computers. My father and my uncle help me to master computers. He helps to understand some difficulties that can happen repeatedly, helps to select the right programs and settings. I like to read different books about programming and building computers, I think it is very important and this is the first step to professional programming, to which I am eager to

...

DRAWING

In my spare time I like drawing. My only favorite technique is graphics. Basically I draw only with a pencil. Previously I drew horses and other animals, but now I draw anime-people, it is my favorite method in drawing. I used to dream of becoming a graphic designer which is connected with the anime and manga ...

Anime and Manga

Manga (manga 漫画, マンガ,) they are Japanese comics, sometimes called komikku (コミック). Manga, in the form in which it exists today, began to develop after the Second World War, was strongly influenced by the Western tradition, but has deep roots in earlier Japanese art. In Japan, manga is read by people of all ages, it was respected as a form of fine art, and as a literary phenomenon, so there are many works of all genres and for a variety of themes: adventure, romance, sports, history, humor, science fiction, horror, business druggies. In 1950 manga became a major branch of the Japanese publishing house. It became popular in the rest of the world, especially in the U.S.. Almost all of the manga is drawn and published in black and white, although there is color, for example. Screenplay adaptations may undergo some changes: soften, if any, the scene of clashes and fighting. An artist, drawing manga, called manga, often it is the same and the author of the script. If the script takes the individual, then this script is called gensakusya (or, more precisely, manga gensakusya). It happens that manga is created based on an existing anime or movie, for example, "Star Wars" or "Harry Potter". However, the culture of anime and otaku "would not have arisen without the manga because few producers willing to invest time and money in the project, which has not proved his popularity will pay off in the form of comics.

Anime (anime アニメ, from the English. Animation - animation) is Japanese animation. Unlike other countries, animation intended mainly for viewing children, most of the anime produced and designed for teen and adult audiences, and largely due to it has a high popularity in the world. Anime is different characteristic manner of rendering the characters and backgrounds. Published in the form of TV serials and films distributed on video or in the cinema. Subjects can describe the set of characters, a variety of different places and eras, genres and styles.

The sources for the story anime series often are: Manga (Japanese comics), light novels or computer games (usually in the genre of visual novel). When Screening graphical style and other features of the original are usually stored. Other sources such as classical literature works are used not so often. There is also an anime, with original plot (in this case anime can serve as a source for the creation of a book and manga versions).

I'm fond of not only drawing manga and anime, but also of watching them. I like to read manga in the evenings and watch anime during the day raising their spirits. My favorite anime are Bleach, Death Note, Naruto and many others ...

Anime and Manga

Examples of my favorite anime:

COSPLAY

Cosplay (anime コスプレ kosupure, abbr. From the English. Costume play - «costume play») - a form of embodiment of the actions performed on the screen. Modern cosplay appeared in Japan among Japanese fans of anime and manga, so it is usually the main prototype of a manga, anime, video games, tokusatsu, or a historical film about samurai. Other prototypes may be j-rock/j-pop-gruppy, representatives of Visual Kei, etc.

Cosplay participants identify themselves with some character in similar clothes speaking the same style. During cosplay role games are often played. The costumes are usually sewn on their own, but they can also be made in the studio or be ready-made (in Japan, for example, the business of production of costumes and accessories for cosplay is quite successful).

Cosplay is usually carried out at festivals, on the relevant parties and events devoted to the anime and manga culture. Major cosplay festivals are the "Manifesto" in St. Petersburg, "The Animatrix" in Moscow and Anime Festival "in Voronezh.

Well, I like to take part in various events, celebrations, festivals cosplay. Several times a month my friends and I met to discuss upcoming cosplay. That is: where and how to spend it, compose script and music, sew, or buy ready-made clothes ...

ANIMALS

I love animals and zoology. My favorite animals are horses, cats (domestic and wild), dogs, wolves, and others. I really like the science of zoology, In my childhood I used to dream to be a vet, but considering some bad sides of this work (such as: causing pain to the animals) I gave up that idea. I do not like to make pain to my best friends ...

Embroidery

My another hobby is embroidery. When I have time I love to sit and design different pictures. But this is not a easy hobby, you need to determine the center correctly to have enough space. But there is a huge advantage. The finished work is the original décor item

...

Polo (born Polo) - a team sport with a ball, in which participants play on horseback, and move the ball across the field with a special stick. The goal is to hit the gates of rival most times.

The game originated some centuries ago among the nomadic peoples of Central Asia, has been spread to Persia since 6th century. The central square of Isfahan - Nahsh-e Jahan was once the stadium polo directly under the windows of the Shah's palace.

The game was restored by the British army in India. The team consists of 4 people. The size of the field is 300 yards in length, 150-160 yards in width (about 9 football fields). The ball is 3 ¼ inches, it weighs 4 ounces. Stick is traditionally made from bamboo specially grown for it.

The match consists of periods, called Chakka, the period lasts 7 minutes. The match, may consist of 4, 6 or 8 periods. The most popular variant is of the 6 periods.

It is most popular in Britain, the USA, India, Pakistan, Argentina and Australia.

SPORT

Sport is my one more passion. I enjoy different kinds of sport: football, volleyball and basketball, I love cycling, motorcycling and racing. But my most favorite sport is horse riding, probably it is because horses are my favorite animals ... When I have a chance, I always go to the local hippodrome, where I take a rented horse and ride it. I'd like to take courses in a riding school ...

Dressage - kind of equestrian sport, a riding school. During competitions in dressage rider and horse perform various elements of riding in a certain sequence they demonstrate the correct rack, side-bending of taking, Menke foot arcade, Piaffe, transitions from one gait to another, challenging turns and pirouettes. The complexity of elements depends on the level of riding. The rider must demonstrate a level of horse's fitness, its athletic data and the ability to perform the correct and productive movement in all paces at various speeds, while maintaining the correct position of the body. In dressage amateur and professional can compete. Dressage is an Olympic sport.

SPORT

Jumping (Fr. concours hippique - horse race) - competition for overcoming obstacles (from 6 to 18), passed on the jumping field. Jumping started in the middle of the 19th century in Belgium, then came to France and Italy. In Russia, the first contests was organized in 1889. Depending on the number of obstacles and their height jumping is divided into easy, medium, hard and advanced. Also jumping contests are divided into "optional", "to the first error", "hunting parkour", "the style, speed.

Jumper field, playground for the competition to overcome obstacles. It is not less than 40x75 meters, in a closed arena it can be at least 20x30 m. In summer they choose the site with soft soil and low grass cover. In winter with a shallow, hard-packed snow. Obstacles are set up so that they overcome without reducing the rate of field gallop on the turns. Start and finish are denoted by fastening to poles or with flags for samples red for the right, white for the left, 8 m from each other). For the panel of judges at one of the sides of the court the platform with a bell, gong or electric bell is set. Field radios are preferably to equip the platform or benches for spectators, they must be set in a convenient place for the review panel with the

Horse Racing is a kind of horses' testing for agility (speed), which results in the conclusion of the fitness for further breeding (use of the breed). It is important to understand that race are not kind of equestrian sports.

Races are held in different age categories. Thoroughbred horses begin to gallop at the age of eighteen months. The most important leap in the life of a horse is Derby (Derby or the Oaks) in which they take part at the age of three. They run the classic distance of half a mile (2400 meters).

Typically, races are held on the racetrack. Often jumps are associated with gambling

Basketball team sport with the ball. Basketball is played by two teams, each consisting of five players. The aim of each team is to throw the ball in a circle with a net (basket) and prevent the other team of possessing the ball and throwing it in your cart. Shopping Cart (ring net) is located at a height of 3.05 meters from the floor . 5 players of ach team are on the field (a team has 12 players, the replacement is not limited). A free throw is estimated at one point. The standard size of a basketball court is 28 meters long and 15 meters in width. Basketball is one of the most popular sports in the world.

SPORT

Volleyball is a kind of team sport in which two teams compete on a special pad divided by the net.

Volleyball is the combination where each player has a strict special place. The most important qualities for players are high rising over the net, reaction, coordination, physical strength to effectively work attacking strokes.

For volleyball fans it is a common way of entertainment and recreation due to the simplicity of the rules and the availability of inventory.

There are numerous options for Volleyball, branched off from the main form - Beach Volleyball (Olympic appearance since 1996), mini-volleyball, pionerball, park Volleyball (FIVB approved by Congress in November 1998 in Tokyo).

J-Rock (manga ジェイ ロック - jeirokku Japanese rock) is a generalization of the name for the directions of rock popular in Japan. Often it's confused with Visual kei, which is false, because the second is a subgenre of the first. Often used to refer to all areas of rock in Japan in general, but sometimes it is also a popular designation of J-metal, J-punk J-ska, and for the Japanese groups of data lines.

MUSIC

© Francesco Castaldo

Gothic rock is a musical genre that is a subgenre of alternative rock. The first musical bands playing in this genre have been closely associated with the British punk-rock and post-punk. In the early 1980's the genre became a separate direction. In music, dominate dark themes and intellectual trends such as romanticism, nihilism, and the gothic tendency in art in modern times. Gothic Rock became the basis for the Gothic subculture, which was considerably expanded later.

As you can see music is also one of my favorite hobbies. Most of my favorite genres are Japanese-rock, hard(emo)-core, gothic-rock, screamo and hard rock. In my spare time I played the guitar and drums in a musical group. But when the guys entered universities, the group disbanded. We played purely for ourselves, not for the glory of the audience. We do not like the glory, we just love the idea of rock ...

Emo-core:

- Screaming and screaming welcome to the splitting of false vocal cords in the styles of music as black metal, grindcore, death metal, metalcore, emokor, deathcore. It can be described as a cry, or rather the hoarse cry of a very high tessitura (high-pitched cry). There usually sing male screaming vocalists, but there are exceptions.
- Make-up a kind of screaming, which sounded more hoarse and lower, closer to growl, more relaxed than the typical screaming, and without hysteria. It reminds reading gloomy spells and is created exclusively wheezing ligaments. It is used mainly in Black and dark metal.
- Shray (k) is a kind of screaming, which is a hysterical long howl, which resembles a wolf. It is used in depressive black metal.
- Screamo is a kind of extreme vocals, used in such styles as emokor, screamo, emo-vayolens. Sounds are like a hysterical cry. By extraction technique has nothing to do with screaming. It's done on the vocal cords, through the "falsetto shriek."
- Harsh (from the English. Harsh - «hoarse») - a version of screamo, used in such styles as melodic death metal and metalcore.

Hardcore - the musical genre emerged in the U.S. and Britain in the late 1970's as a result of separation from the punk-rock. The sounds of the songs reflect personal freedom, anarchy, politics, social aspects, straight-edge, veganism, violence, pacifism. Hardcore has had a significant impact on the development of heavy music 1980's and 1990's.

Hard Rock is a genre of rock music characterized by the central role of a solo guitarist and songs, based on riffs. From hard rock to the mid 70 branched off heavy metal, having started the whole "metal" music. The term "hard rock" is sometimes also used as hyperons for "serious" genres like heavy metal, grunge, etc., in order to distinguish them from pop-rock.

Due to specifically played electric guitar some effects such as distortion and overdrive) are reached

Here I saw the valley ... Photos taken on the way to Loo through the window of the train.

I love taking photos. I love to photograph different moments and landscapes. In every detail I can see something special ...

Here, I photographed lighthouse in the port of Sochi. I liked it in its solitude, it clearly represents my life, full of loneliness ...

A dry river valley, which turned into many small rivers.

LANGUAGES

I like learning different languages. My most favorite languages are German, English and Japanese. After school I usually spend several hours on languages. I like to take part in various competitions. In the future I want to go to England, Germany and Japan. I want to become acquainted with the traditions and to learn languages better. It's a great possibility to practice!
