# NEGLIGENCE (DEFENITION)

The behavior usually consists of actions, and can also consist of inaction when there is some duty to act

# Types of negligence

- ❑ Often negligence is medical crime (a doctor can help some one but he didn't it, or a doctor exceeded his responsibilities and another situations).
- ❑ Production negligence (when company know about violations, and continuing do their job).
- ❑ Also spontaneous emergencies on the street( for example when one person was dying and another person, who can save him, did nothing and etc).

# Main rule of responsibility

Actually negligence is such type of crime, which people must to avoid (be careful on work, look up everywhere and have sense of responsibility for his rights and responsibilities)

# Manual

- ❑ So there is no protection from negligence. Only you own feels of responsibility, your attention will save you from negligence, so be careful because law is everywhere and people can't hide from justice.

**Thanks for watching**
