

It's me

- My name is Artyom
- My surname is Kulik
- I was born in Gukovo
- I am fifteen
- I would like to live on the health planet, in the clean city
- I think people must take care of our Motherland

It's an interesting world we live in!

We fly to other planets and discover old manuscripts

We create artificial intellect and get to the depths of the ocean

We release tremendous energies...

...and cause global disasters

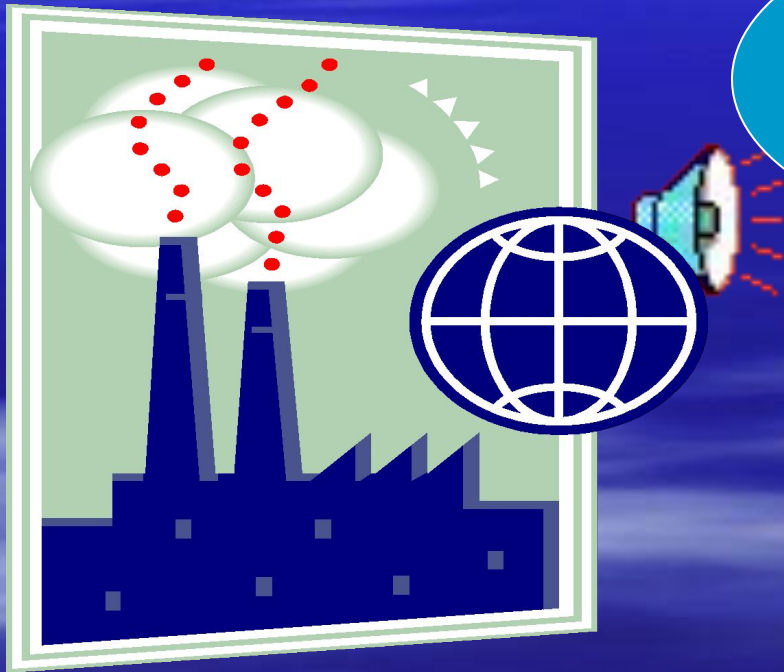

...and pollute our beautiful planet!!!

The Earth is our home
Be kind to her

Our Planet is in a danger
You can and must help it!

Who is it?

Help me!
Help me!
Help me!

It's our
little
Earth!

We have this

Air pollution

Garbage

Global
warming

Environment
problems

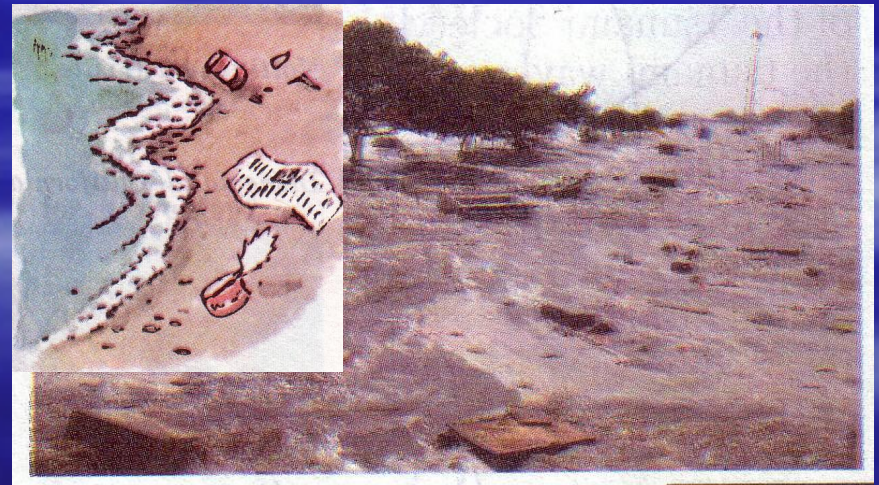

Water
pollution

Disabled People and
animals

Now in some places people can't
swim in the sea, because the water
is so polluted

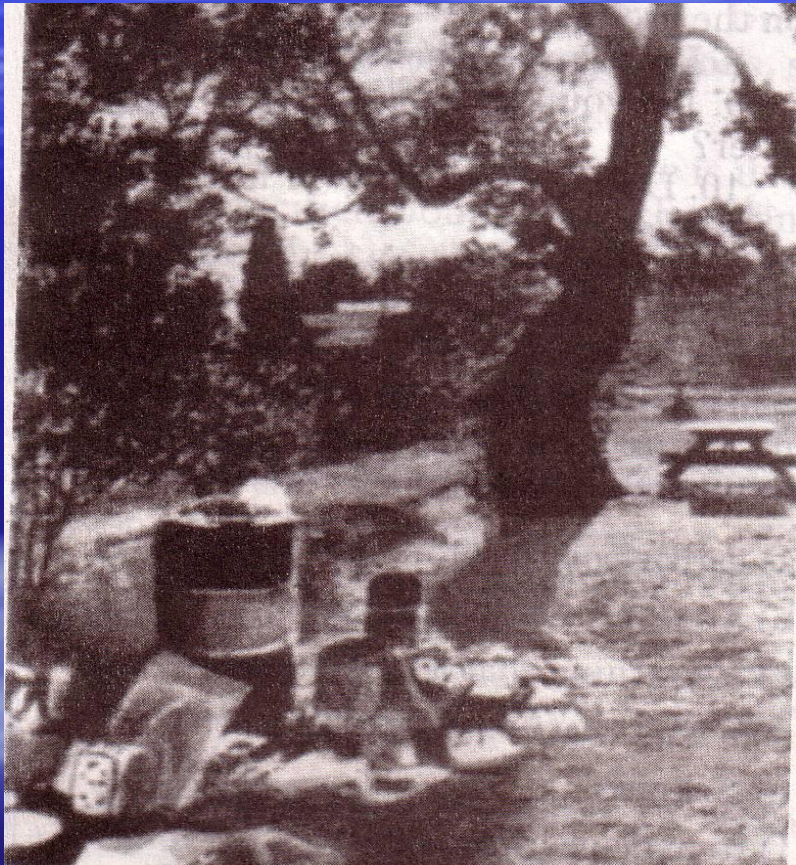

- Our seaside before the visiting of the tourists
- ...and after...

Litter is a problem in our cities

- Litter is garbage – like food, paper, cans – on the ground or in the street.

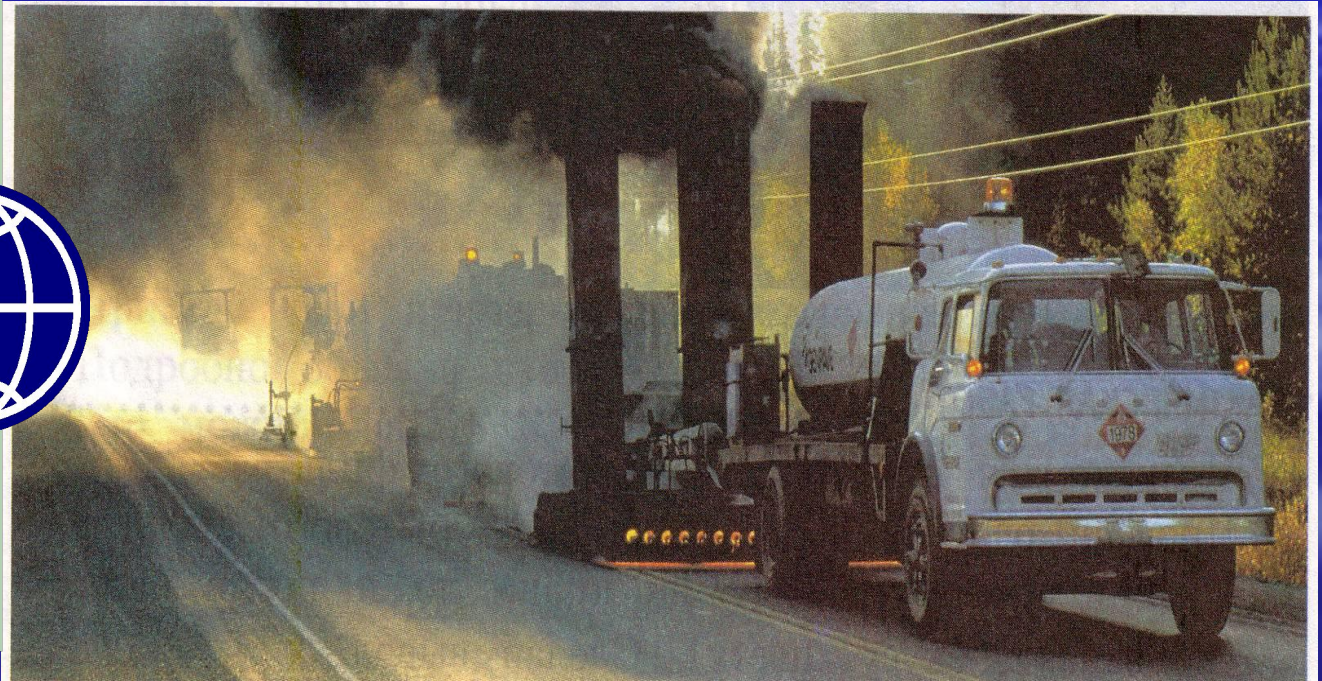

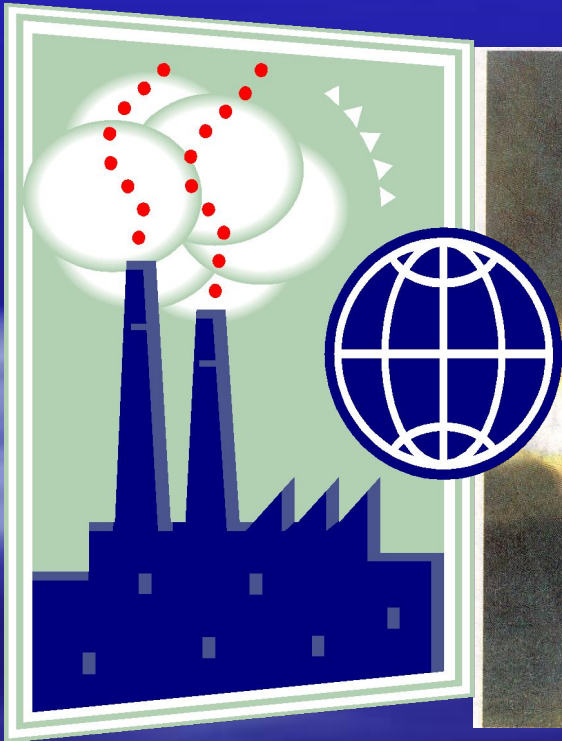

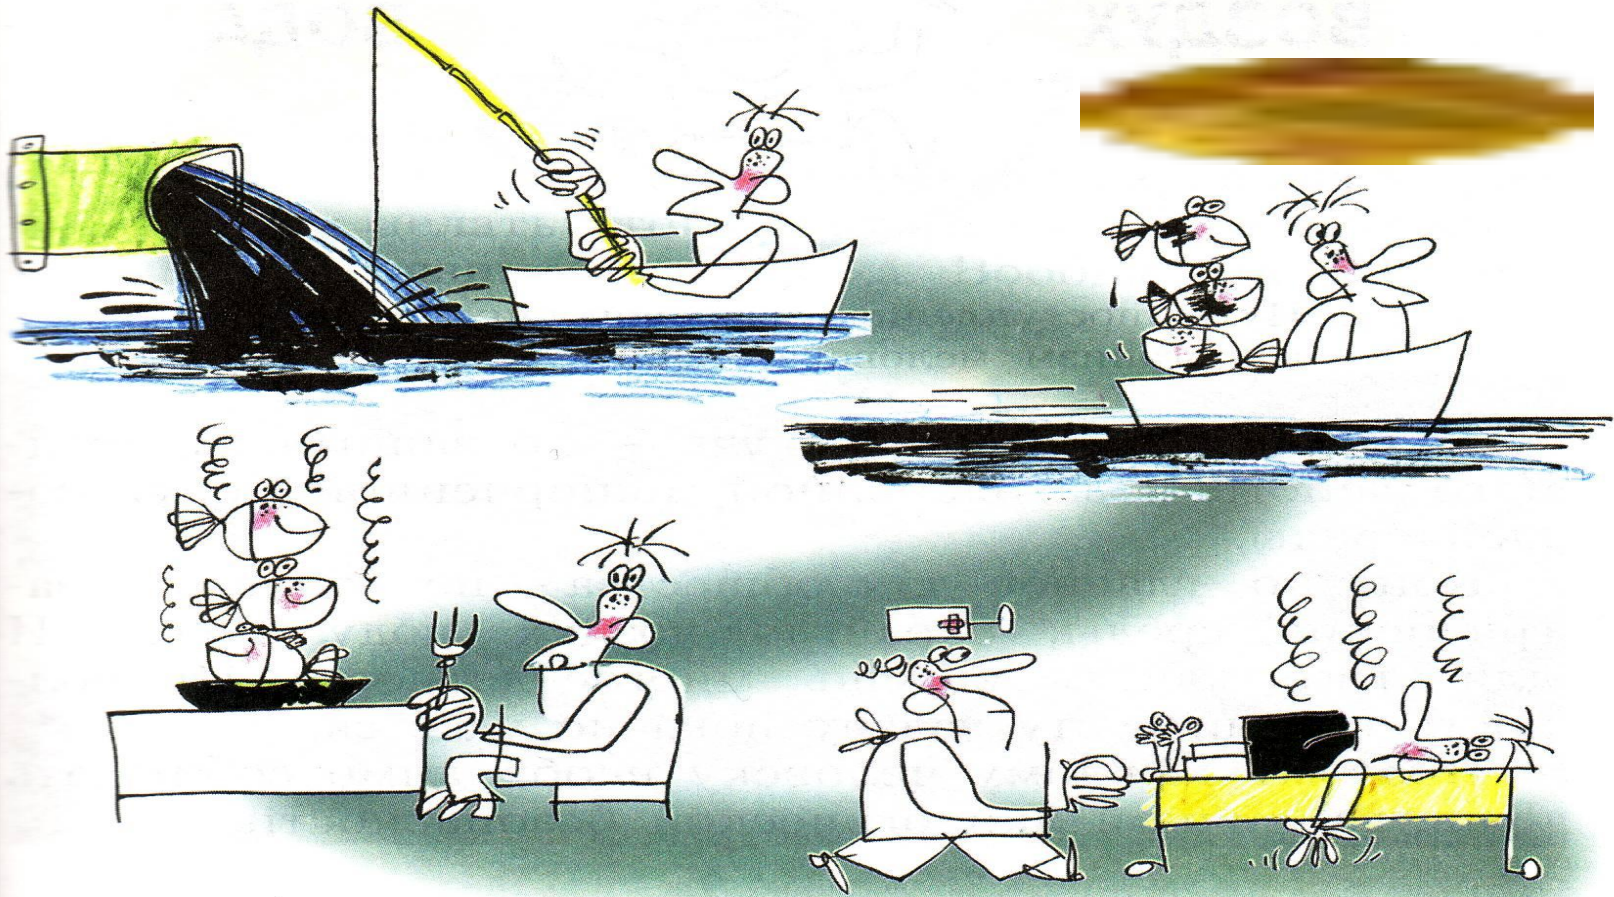

- The wind blows paper far away.
- Often they are difficult to catch.
- When they blow against a fence, they stay there.
- This fence is a wall of garbage.

We need in the clear air but...

- Our factories, plants and transports throw a lot of dirt into the air.

The chain of the pollutions

We can lose

- Fresh air
- Green forests
- Clean water
