

The Review

Amnesia: The Dark Descent

If you wake up in the huge house, full of strange notes, and you don't remember anything – congratulations , you are in “Amnesia”

The word "Amnesia" is written in a large, white, highly stylized font that resembles jagged, dripping paint or a gothic script. The letters are irregular and sharp, set against a dark, textured background that looks like a wall or a piece of old paper.

– THE DARK DESCENT –

At first, this game seems to be peaceful and interesting...

To be honest, you won't understand anything until the middle of the game. Flashbacks are too realistic, so our half-crazy hero becomes crazy at all from time to time.

As the game progresses you will find out, that our hero has a lot of secrets so he had to drink a mixture to forget all that stuff.

Also you will find a lot of different notes from you, to understand what is going on.

In few words – you are chased by the Dark side – The Shadow, because of one artifact.

Also your old friend Alexander is not the most honest one, so you have to escape from 2 enemies and solve a lot of problems.

But don't forget, that this game is a **Survival horror**.

To be honest , the game is quite scary... You can hear a lot of scary sounds behind you, on the corner or on the other side of your castleRRRR

You have to run away from monsters in the water, that wants to eat your meat.

From monsters in most of rooms...

From “monsters” on the walls

Будь внимателен, Даниэль. Иди прямо и не делай ни шага в сторону.

And from the guards (thanks your friend Alex)

But monsters are not the main problem, if you can hide

Your hero becomes crazy because
of the dark... but you don't always
have the light....

For sure it is quite *strange* game..

But it is very interesting and exciting!

So, from me, this game gets 4.5/5
Play it and find out, will our hero stay alive?

Thanks for attention!!
