

# ***Presentation of the topic: Transport***

*Work : Karluka Maksim  
10 – B class*

? In our world,  
probably most of the  
people have their  
own personal  
transport, but also  
there are people who  
do not. There are  
also public  
transport. Public  
transport: bus, train,  
metro, tram, taxi

? *Also, we can face every day with different weather conditions: ice, rain, snow, strong wind*

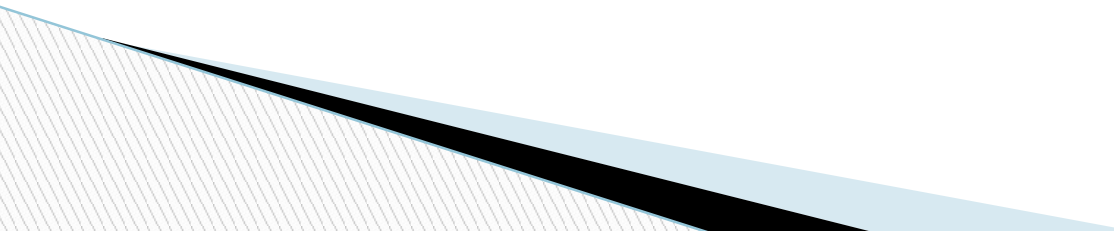

*I took for comparison trucks from the two countries and show their difference .  
It looks like a train, a bus and a taxi in London*

# ? It looks like a train, bus and taxi services in the Czech Republic

- ? Having your own transport is always very conveniently . At any time, you can go exactly where you want, and you know that it is not does not depend on someone . Often we meet on the roads of traffic jams and accidents, which should be avoided. On the road, you have to be careful and calm.*
  - ? Other vehicles, such as an airplane, train, bus - they are no less dangerous, I would say even more. So, how the situation can be different, and in recent years has more failed cases .*
- 

? Thank you for attention !!!
