□ Houses around the world

# Houses around the world

We want to show you the influence of the geographical position of a country on houses.

# Mongolia

## A white house in the Grasslands

The grasslands continue as far as the eye can see. White specks dot the landscape here and there. As you get closer, you can see that these specks are actually houses. These are yurts (or *gers*), the portable, folding homes of people who live as herders of sheep and horses.

# China

## Living Together in a Circle

Deep in the mountains, there is a round earthen building called a tulou. It is surrounded by a thick dirt wall. It looks as if a huge flying saucer has landed. It is in the Fujian province of China. There are as many as three hundred people living in this tulou.

### China

#### Living Together in a Circle

**D**EEP IN THE MOUNTAINS, there is a round earthen building called a tulou. It is surrounded by a thick dirt wall. It looks as if a huge flying saucer has landed. It is in the Fujian province of China.

There are as many as three hundred people living in this tulou. Looking through the gate in the wall, you will find it is very lively inside. Take a few steps, and here and there you will hear people calling to you to stop for tea. In the middle is the hall for an entire world up. Looking up, you can see a round circle of sky.

# Indonesia

## Houses with Pointed Roofs

These houses on Sumba Island, Indonesia are made from bamboo and grass. Livestock, such as water buffalo and pigs, live under the raised floor, and the people live above.

ods are sa

# Romania

## A House with Eyes in its Roof

This village is in a clearing by a forest full of fir and oak in the Maramures region of Romania. Here, even the roofs of the houses are made of wooden shingles. As you walk through the village, you'll feel as if someone is always watching you.

# Tunisia

## Living underground

If you climb a small hill and look down at the village of Matmata, you might notice there are many holes that look like craters on the moon. These holes are actually houses.

# Spain

## Houses that Breathe through Chimneys

Many white chimneys spring out of the ground! If you climb up the hill that it is coming out of. You'll feel as if your footsteps are echoing underground.

# Togo

## Earthen Castles

A house made of mud stands close to a large Baobab tree in the Tamberma region of Togo, Africa.

# Senegal

## Is this Roof Upside-Down?

The house in the center of the village collects rainwater inside the home to use as drinking water.

These houses are in the Casamance region of Senegal, Africa.

# Bolivia

## Houses Shaped Like Acorns

The Chipaya people live on a plateau in the Andes at an elevation of 10,000 feet above sea level. If you listen carefully, you can hear the faint sound of a stream. White crystallized salt rises to float on the surface of the damp earth near the stream.
