

We are from the Earth planet  
the Milky Way Galaxy

# Our planet goes round the Sun.

- It's blue,  
as there are 5  
oceans,
- green,  
as there are many  
forests,
- bright,  
as there are many  
flowers on it.

**Our planet is very beautiful.  
But there are a lot of problems:**

- wars,
- poverty,
- pollution.

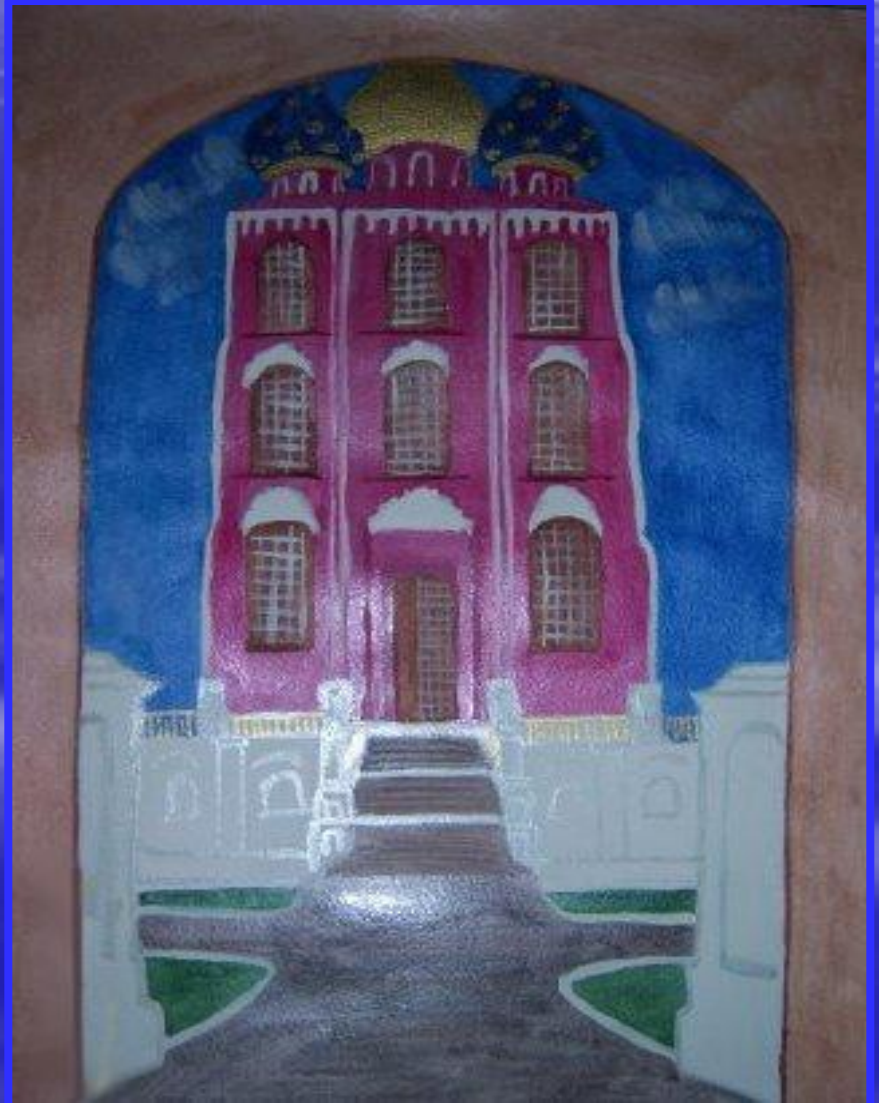

**We are trying to overcome our  
difficulties and we hope people will be  
happy soon**

Our planet is inhabited by animals and people. We are people. We study, play, write poems, compose music, cure other people, drive cars

Our culture is very rich. We have constructed wonderful building, towers, monuments.

# We designed different cars, planes, ships.

We would like to show you our  
planet and share our knowledge  
with you

We would like to learn about  
you!

We wish you peace and  
love!

# The pupils from the Earth, School № 63.
