КОКТЕБЕЛЬ

A close-up photograph of a dolphin's head and upper body as it swims in clear, deep blue water. The dolphin is looking directly at the camera with a calm expression. Its skin is a light, silvery-grey color, and its eyes are small and dark. The background shows the gentle ripples of the water's surface, creating a serene underwater atmosphere.

**Dolphins,
who are they?**

Dolphins are related to a family of mammals, of the cetaceans order

**What is the difference
between dolphins and us?**

Similarities and differences

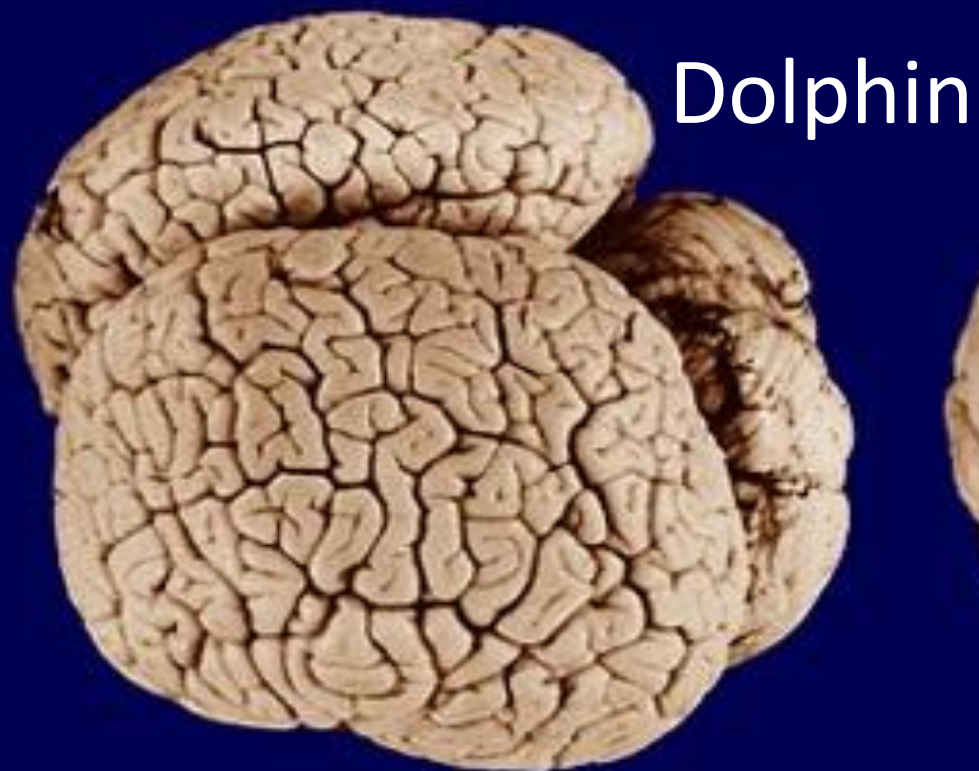

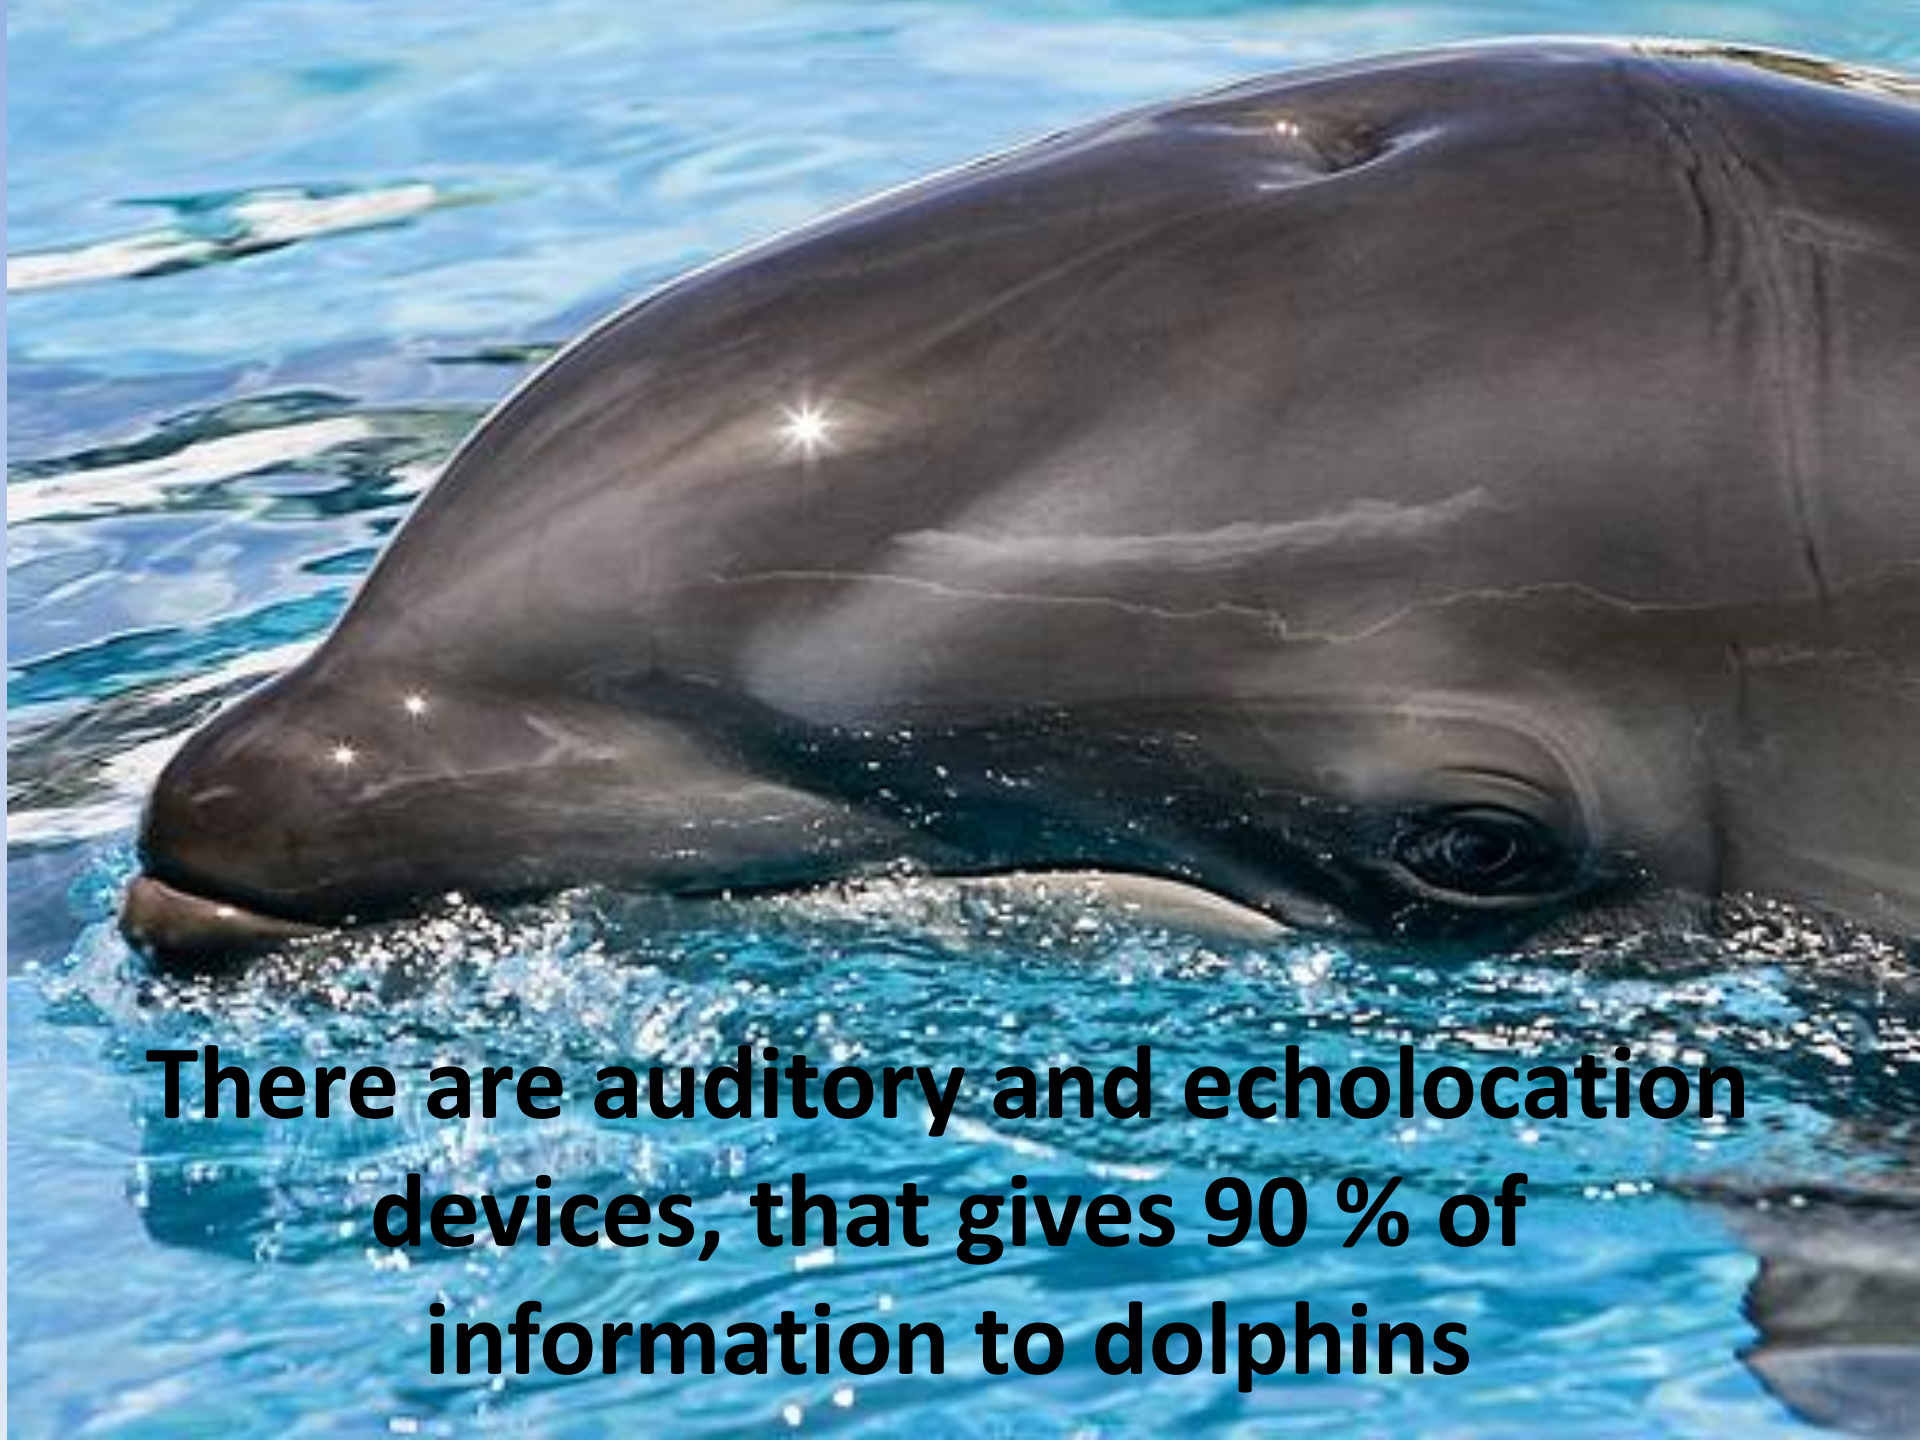

Similarities

- 1) Average height
- 2) Common ancestor
- 3) Warm-blooded
- 4) Viviparous
- 5) See the world in the same shades
- 6) The same kinds of diseases (stroke, heart attack, diabetes, neurological disorders)
- 7) Creative approach to the process
- 8) Gregarious lifestyle
- 9) Communication between each other
- 10) Amenable to learning
- 11) Availability of names

Differences

Dolphins	Peoples
Habitant	
water	land
Brain weight	
1.7 kg	1.4 kg
Gyros	
Dolphins has two times more	
Sleep	
Awake	Asleep
Information about the world	
90% echolocation and hearing aids	70% vision
Perception of sounds	
3000 Hz – 20000 Hz	20 Hz – 20000 Hz
Perception of high frequency sounds	
Yes	No
Life expectancy	
20 – 30 years	45 – 55 years

There are auditory and echolocation devices, that gives 90 % of information to dolphins

The amazing sounds

**Even after
the death of
the dolphin
skin remains
intact**

A close-up photograph of a beluga whale's head in profile, facing left. The whale is white with a dark eye and a small, open mouth. A large, frothy bubble of air is being blown from its mouth, expanding into a cloud of fine bubbles. The background is dark and out of focus.

Intellectual
abilities

Dolphins live in packs

Assistants

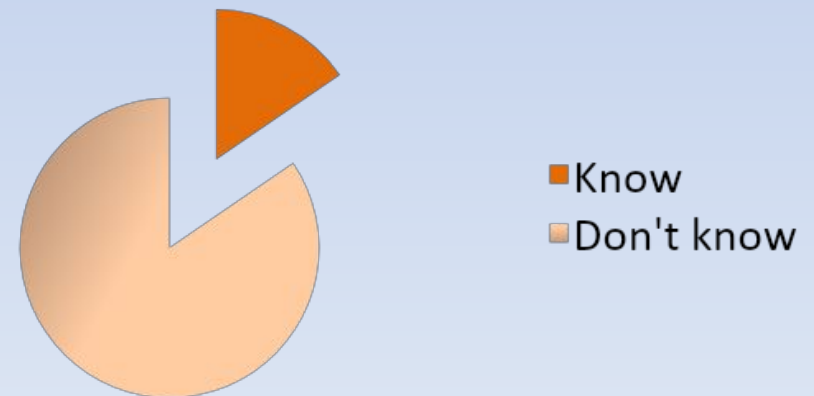

Interview

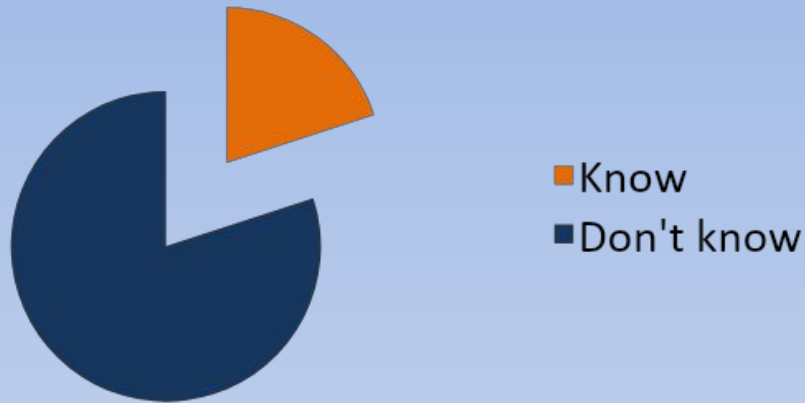

To what troop do dolphins refer to?

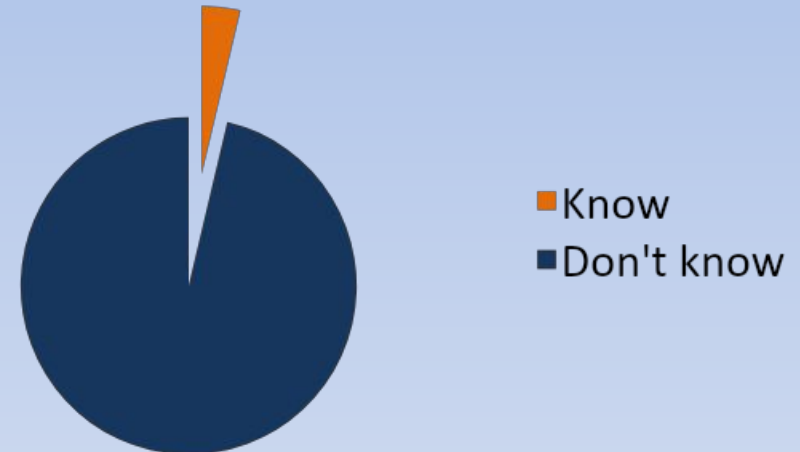

Do the dolphins have names?

**Do dolphins have
their own language?**

Do dolphins sleep?

**Which organ of sense gives
the basic part of
information?**
