

Manual for PowerPoint template

PowerPoint (PPT) Template

- ◆ Use this Powerpoint template for all internal and external (client-facing) presentations.
- ◆ This PPT has been designed with the latest Luxoft corporate branding.
- ◆ This deck includes various master slides and graphics for you to build out your branded presentation.

Manual for PowerPoint template

Getting Started

- ◆ **If you know how to use it, you can delete all slides below and start with your own presentation.**
- ◆ To begin making your presentation click the arrow on the New Slide button in the upper left hand corner of this window.
- ◆ Click the master that best suites the slide you are creating.

Manual for PowerPoint template

Slide Masters

◆ **Luxoft: Computer/TV**

For small rooms / small audience

For computer / HD TV screens

Smaller text size has been set to allow you to put more content

◆ **Luxoft: Slide projector (board room)**

For bigger audience

For beamers / projectors

Bigger text size has been set to increase readability

Manual for PowerPoint template

Colors

- ◆ This Powerpoint has a defined "Theme Color" palette for you to color objects and text. These are RGB colors from our color palette.
- ◆ If you have the need to use more colors (other than the Theme Colors), you can manually change the color of objects and text by clicking "More Colors" in the color menu (for the text or object color you're wanting to change), and typing-in the RGB values.

Manual for PowerPoint template

Additional graphics

- ◆ This deck includes transparent devices for you to use with screenshots if needed,
- ◆ Also you'll find world maps with our global locations included.

Manual for PowerPoint template

Best Practices: Text

- ◆ A good rule is: less is more. Instead of trying to cram a long sentence onto a slide, try to edit the text to be short and sweet.
- ◆ Large blocks of text are often ineffective. Use bulleted phrases instead.
- ◆ Slides presented in large audience rooms should have no more than 6-8 lines each.

Manual for PowerPoint template

Best Practices: Color

- ◆ Use the same colors consistently throughout the presentation (i.e. use the same color for all titles, each level of text, and all backgrounds).
- ◆ Make sure there is enough contrast between colors so they can be easily distinguished, especially background and text colors.
- ◆ Consider how your slides will look on a projector. Try to have the best contrast, so even the worst-quality projectors can display your content legibly.

Manual for PowerPoint template

Best Practices: Graphics

- ◆ Try to build or assemble your content INSIDE Powerpoint vs. illustrating a slide in external applications and then bringing an entire slide image into Powerpoint (especially for text that may need translated within Powerpoint). The more we can build inside Powerpoint, the easier it is to make future edits.
- ◆ In the event highly-custom slide need to be built, please keep the source files (screenshots, vectors, bitmaps, etc.) with the Powerpoint project to help with possible further updates to those graphics.

Manual for PowerPoint template

Best Practices: Saving

- ◆ To retain formatting, be sure to save your PowerPoint presentation file as .pptx
- ◆ To create a blank template (without examples and manuals) just remove unwanted slides and save your PowerPoint template file as .potx
