

Урок математики
во **2 «Г»** классе

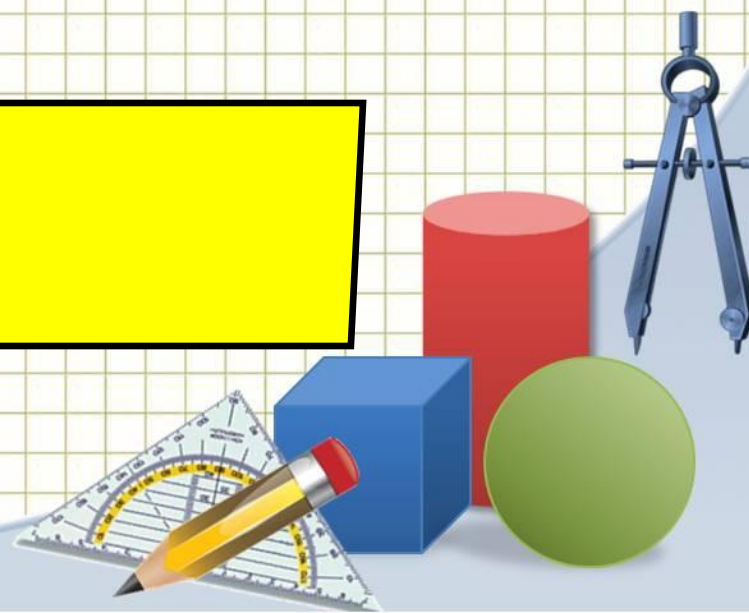

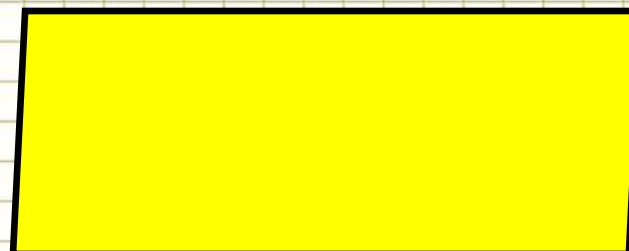

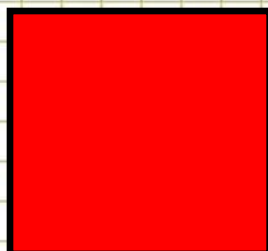

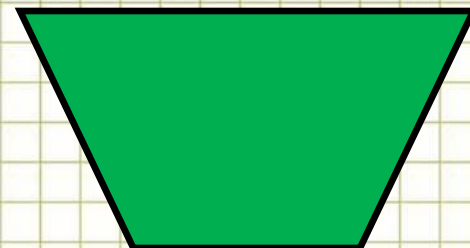

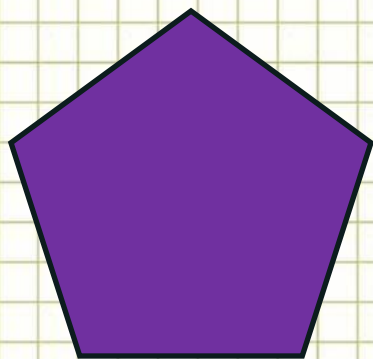

***« В математику тропинки
одолеем без запинки »***

7 декабря.
Классная работа.

Разминка

Устный счёт

$$\begin{array}{r} 36 \\ - 30 \\ \hline \end{array} = 6$$

$$\begin{array}{r} 58 \\ + 4 \\ \hline \end{array} = 9$$

$$\begin{array}{r} 75 \\ + 2 \\ \hline \end{array} = 9$$

$$\begin{array}{r} 48 \\ - 8 \\ \hline \end{array} = 4$$

$$16 + (5 + 5) = 26$$

$$(60 - 20) - 35 = 5$$

$$9 + 6 = 15$$

$$8 + 8 = 16$$

Тема урока:

*Прямоугольник. Квадрат.
Периметр прямоугольника*

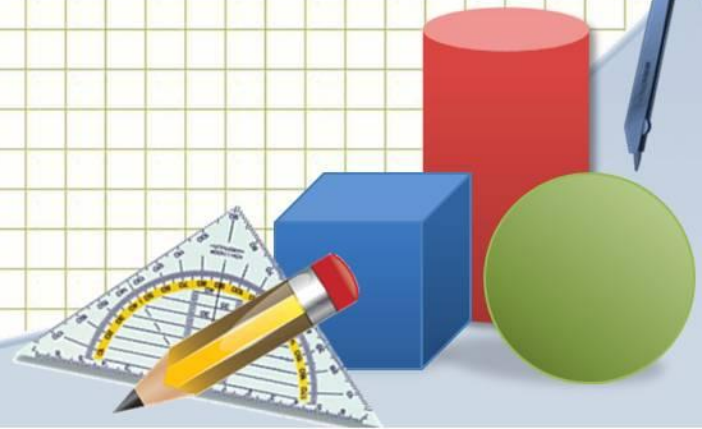

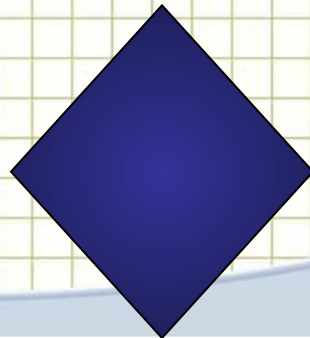

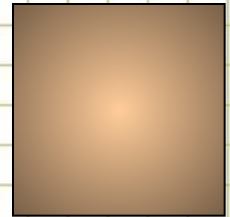

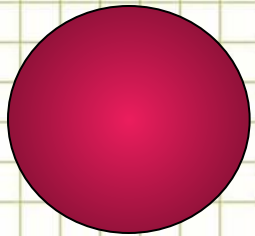

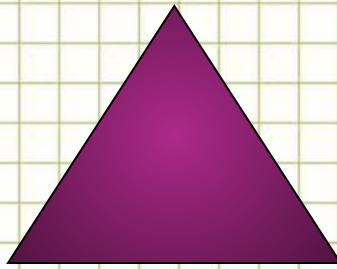

Периметр (P) – это сумма длин всех сторон.

Противоположные стороны
прямоугольника равны.

Физминутка

М

6 см

К

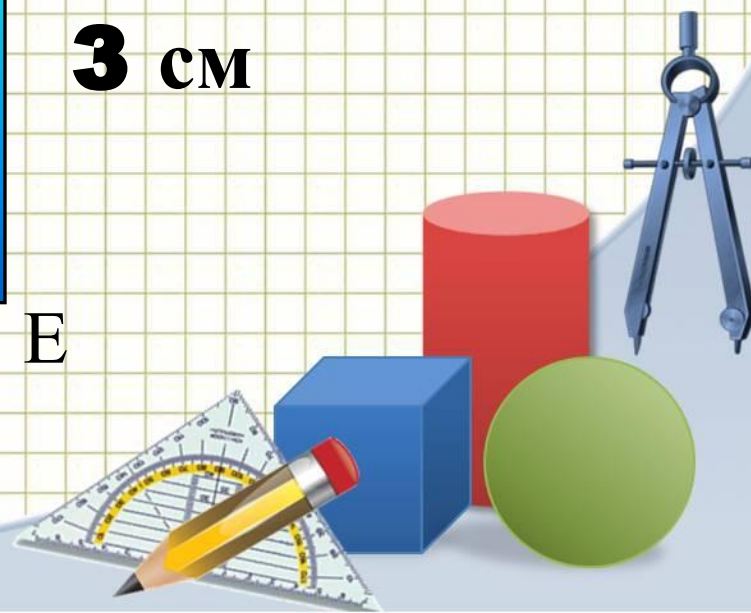

ширина

3 см

А

длина

Е

$$P = 6+3+6+3 = 18 \text{ (cm)}$$

$$P = 6+6+3+3 = 18 \text{ (cm)}$$

Ответ: **18** см.

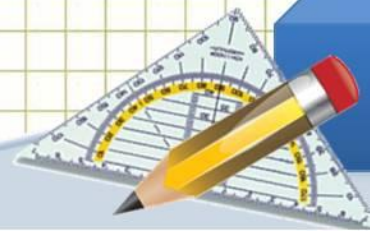

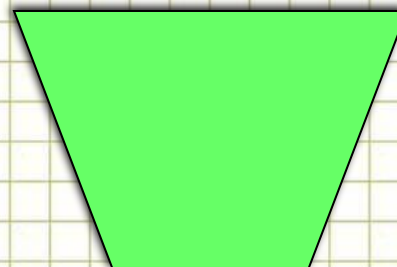

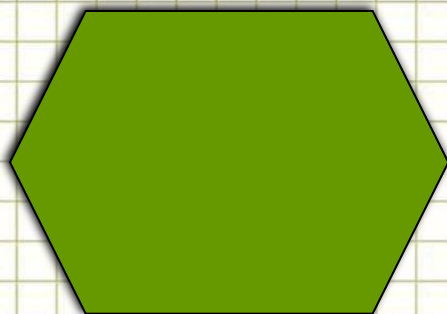

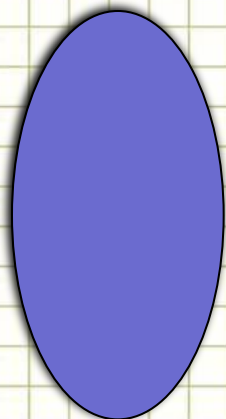

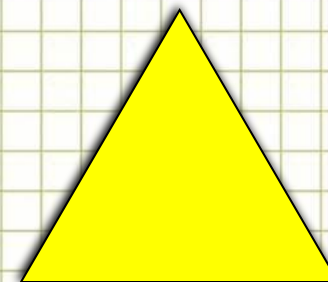

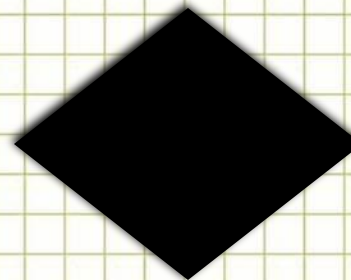

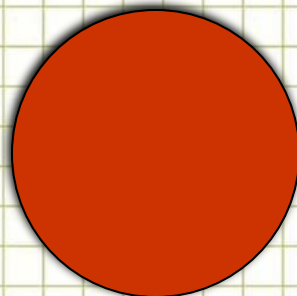

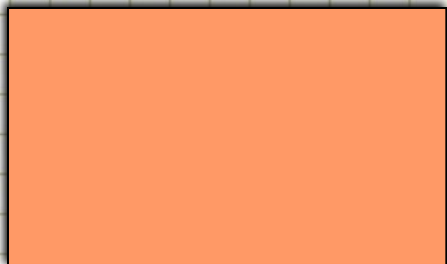

6 см

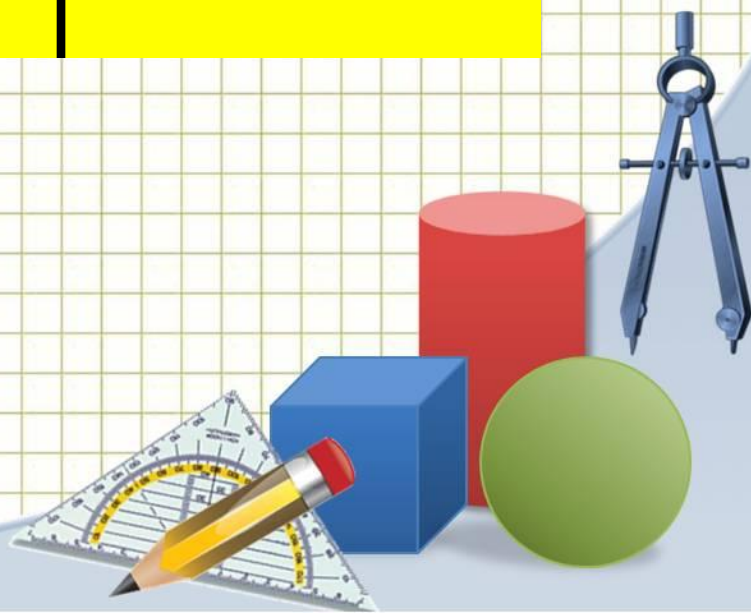

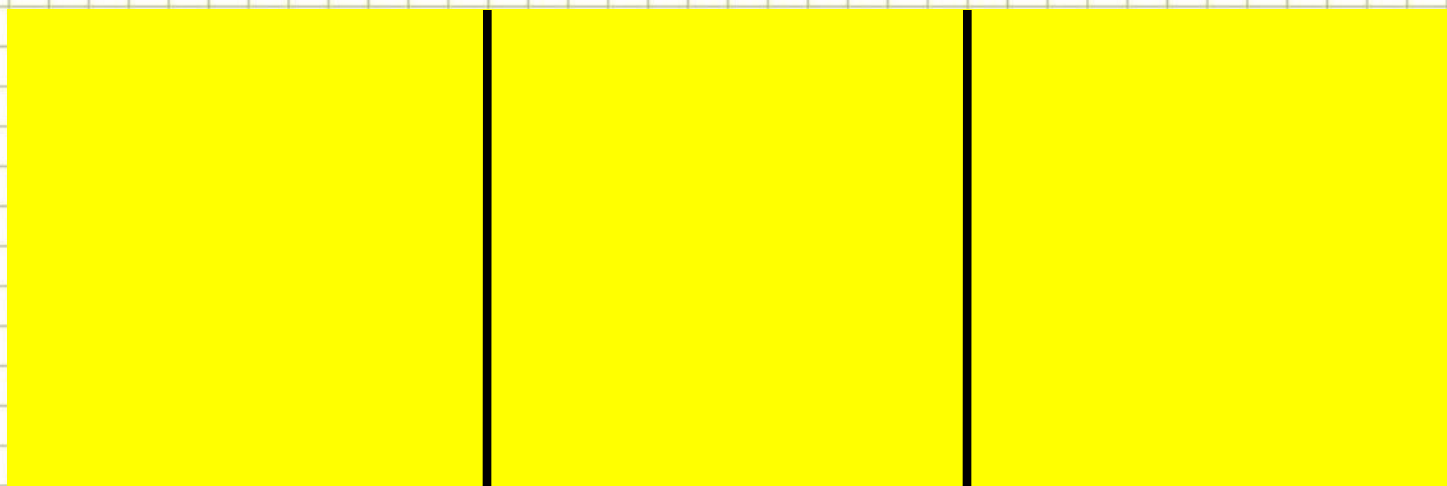

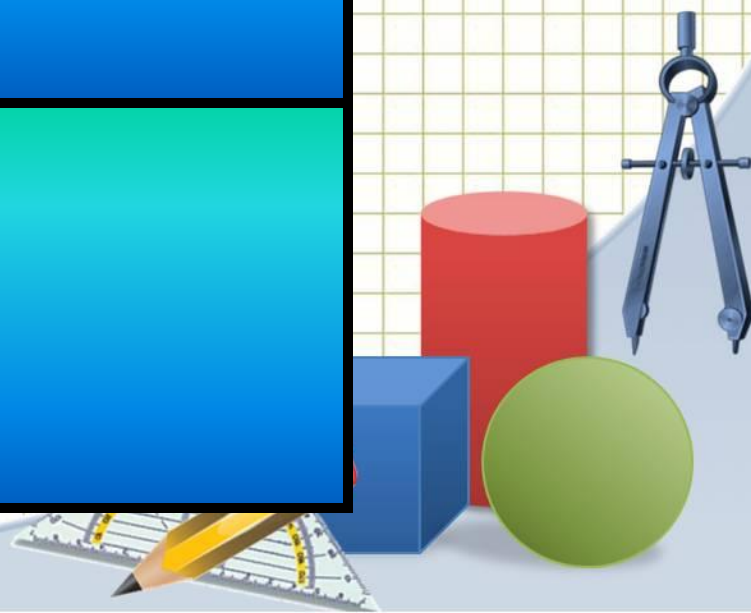

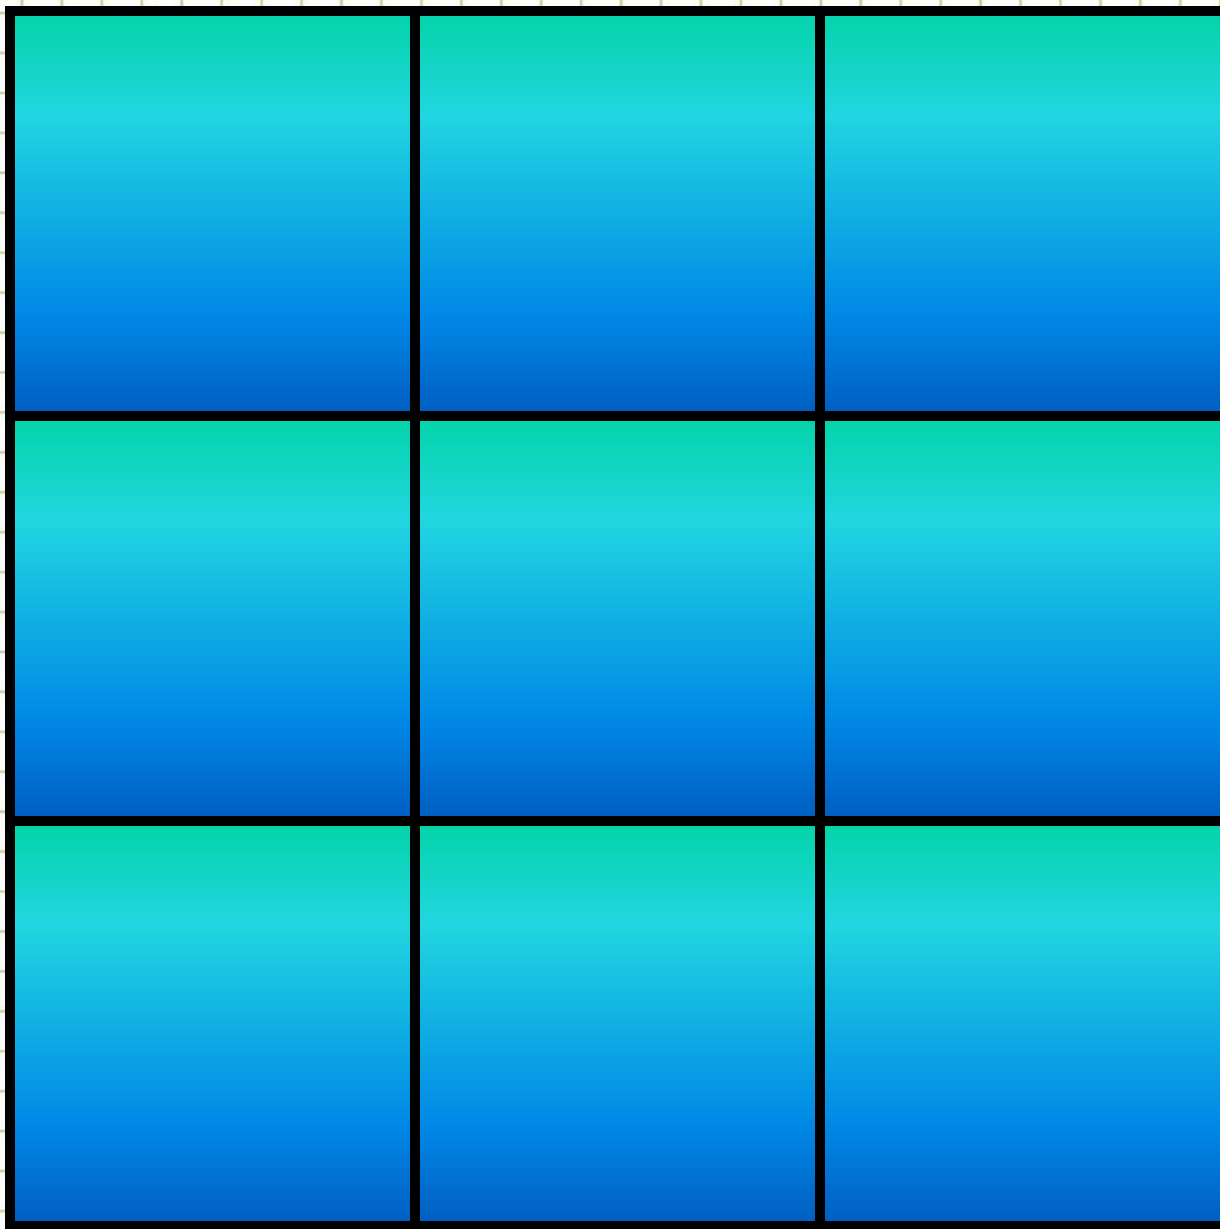

3 см

Рефлексия

Кому было понятно и все
получилось, кто может научить
другого -

Кто затруднялся - было
понятно, но не получилось
-

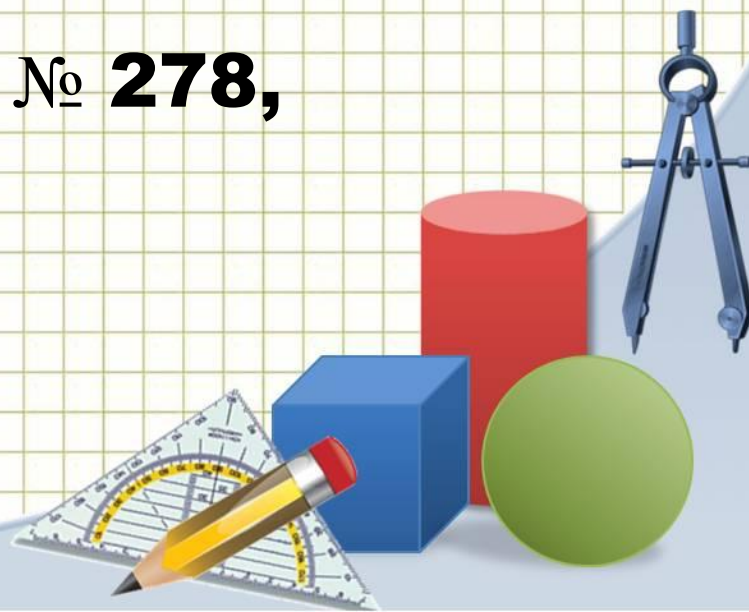

Домашнее задание

– учебник с.**93** № **279**,
ТПО с.**54**

– учебник с.**92** № **278**,
ТПО с.**55**

*Спасибо
за урок!*
