

**Презентация
к уроку окружающего мира
«Когда жили динозавры?»**

**Автор: Касаткина Людмила
Викторовна
ГБОУ СОШ № 1270 ЦАО г. Москвы**

A detailed diorama of a prehistoric forest. Several large, brown tree trunks are visible, some with horizontal bark ridges. The ground is covered with a dense carpet of green ferns and other low-lying vegetation. Sunlight filters through the canopy, creating a warm, golden light in the background. The overall scene is a lush, green environment typical of the Mesozoic era.

Когда
жили динозавры?

**Динозавры сейчас
не живут на Земле, они
давно вымерли. Я это
хорошо знаю, ведь
динозавры — мои
древние родственники!**
