

Melbu

«Melbu» is a version of «Tiller» with basement. Because it is a lot bigger there is a different target group. This is a house for people buying their second home with children from 6-18 years

We need to make the «Melbu» a lot different than «Tiller». They should come across at different houses for the customers. Use different colors, and of course furniture. There are different qualities we can focus on.

EXTERIOR STYLES

3. Outside Styles

Most of the outside life will be on the terrace.

Maybe there should be a small place to sit in a good chair, just outside the bigger bedroom downstairs.
