Task 1

Preparation 01:30

Task 1. Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend. You have 1.5 minutes to read the text silently, then be ready to read it out aloud. You will not have more than 1.5 minutes to read it.

As soon as spring brings a new growth of bushes and berries, bears start feeding. They eat and eat. All through the spring and summer their feeding goes on. The bears build themselves up. They store food and fats that they will need in the fall when they start their long sleep.

As days grow shorter, and the temperature begins to fall, bears hunt for a sleeping place. It may be a shallow cave, or a deep crack between rocks. Some bears end up sleeping in hollow logs. Logs seem to be bears' favourite places. Bears seem to choose small spaces. They can keep warmer in a cave that's just large enough to hold them than in a larger cave. They often line their sleeping place with leaves and dried grass.

All through their winter naps, bears will not eat. Often they will sleep for 7 months, moving only now and then.
