

Future house

Technologies of future houses are focused on security, conveniences, entertainment, modern devices like quantum computer, teleport and etc.

A house will allow save more energy, live more safety, more conveniently. The light is turned off automatically, when you leave the house.

When you come again, clever house turns on TV,
computer, as you like. But I prefer to turn on
music anywhere and more loudly.

Your future house will provide the best feelings, as you can imagine. It can provide carefree life for you with any entertainment.

I think, that future houses will adjust to humidity and air make-up because life in fresh air is very important.

I can't don't tell you about future devices and show you some photo on which you can see car, other effective devices.

Thank you for attention
