<<Vitya Maleev. At school and at home>>

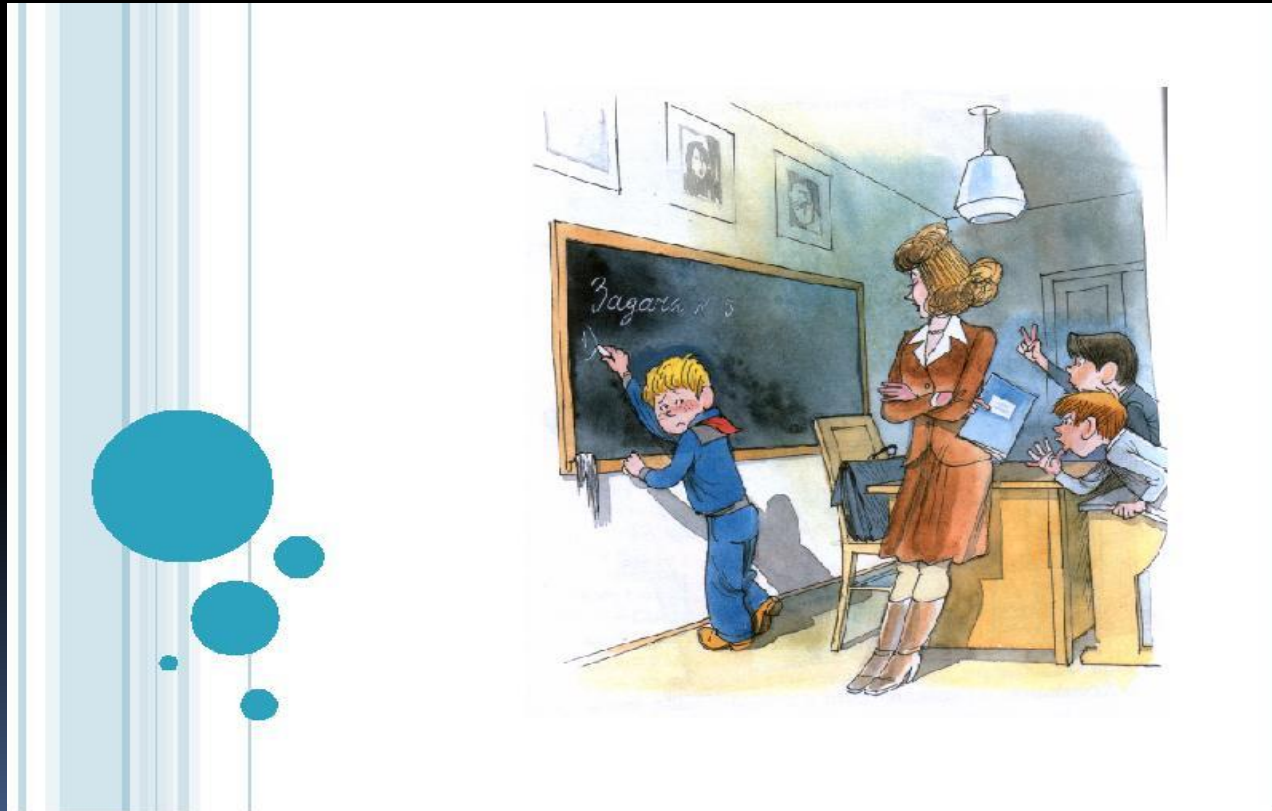

Nikolai Nosov

Nikolai Nosov born
(on November 10
(23) 1908) is Kiev
Soviet children's
Writer-novelist,
playwrite,

Vitya Maleev

Vitya is not good at math, especially problem solving. But he does not give up and fights with the Queen of science, as a result, corrects his deuce. Vitya is persistent, sets a goal and achieves it.

Prehistory

- *To think how quickly time flies! Before I knew it, the holidays were over and it was time to go to school. I spent the whole summer running around the streets and playing football, and I forgot to think about books. Russian Russian is not the only language that I read, but also some fairy tales or stories, so that I could study Russian or arithmetic-I was not a good student Of Russian, and I did not like arithmetic. The worst thing for me was to solve problems. Olga Nikolaevna even wanted to give me a summer job in arithmetic, but then she regretted it and transferred me to the fourth grade without a job.*

My opinion of the book.

- My opinion is that the book teaches you to be fast in everything, to finish the job and never give up if it is hard as a study, I have read this book 5 times and never gave it any importance that this book I have already read, so I recommend everyone to read this book, this book will stay in your heart forever
