Real View LLC

http://prokitchensoftware.com/

Real View LLC was founded in 1999 with the goal of providing state-of-the-art Java 3D visualization capabilities to designers, retailers, and manufacturers seeking premium service and increased customer satisfaction.

Software supports Desktop: Apple and PC devices Mobile: iPhone/iPad, Android, Windows 8

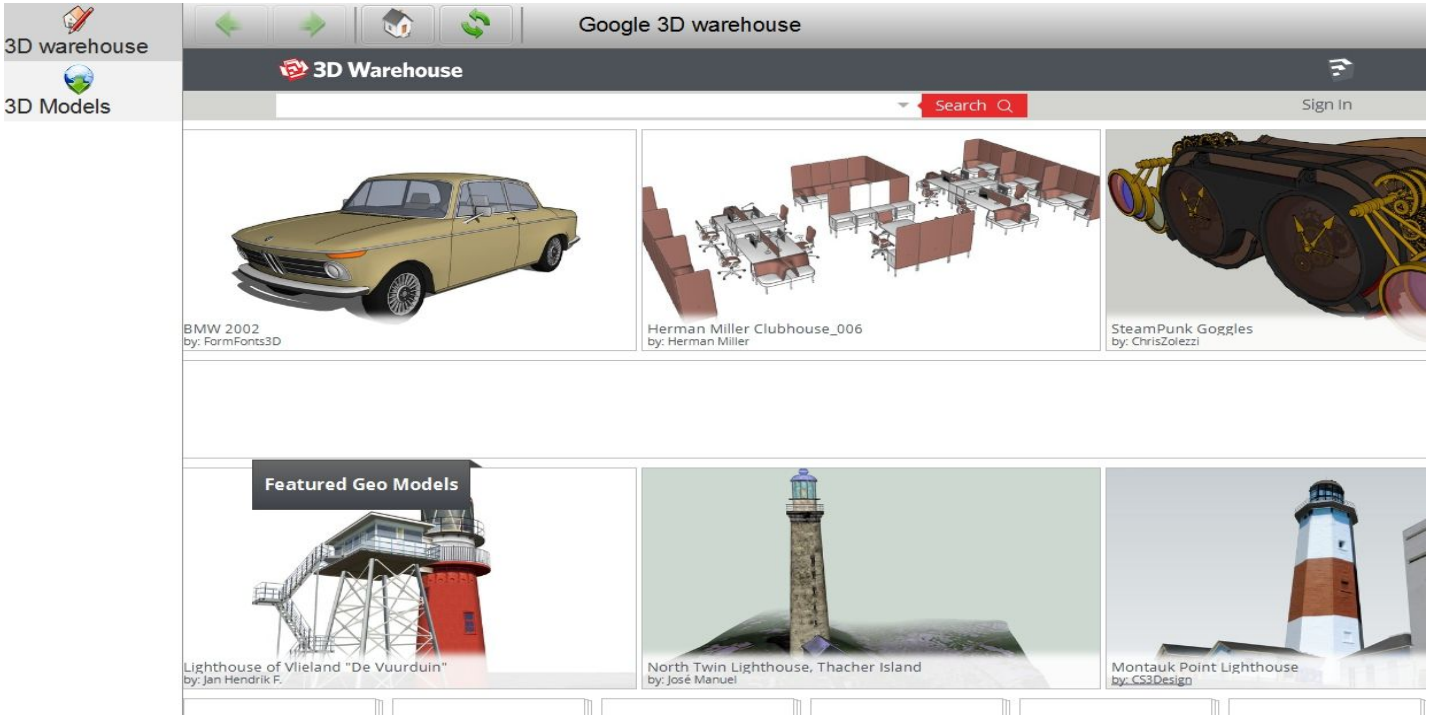
Professional K&B design software available on the market that runs on both Windows and native Apple MAC. It is a unique solution and powerful tool for designers who utilize multiple platforms.

Supports 300+ manufacturer and appliance catalogs. Approved software for NKBA CKD EXAM

All catalogs get updated a few times a year and are provided to all our customers via the automatic catalog update. Whenever a new catalog update is available our customers receive it within minutes.

Google 3D model browser

Import 3D Shapes from Google's 3D Warehouse on Windows and Native Mac. Create your catalog on the fly and add imported 3D shapes to your catalog. Use hundreds of thousands 3D shapes from the Google's Warehouse to embellish your designs.



Web Planner

Web Planner is the only Java based K&B software that can be run on all browsers with the complete set of manufacturer catalogs.

Server Edition

Server Edition is a unique server solution. With Net you pay only for the licenses you use. Plus, multiple designers can share the design and work together. And since all customer information and designs are saved on the server, everything is in one place. What could be easier?
