

The Earth .

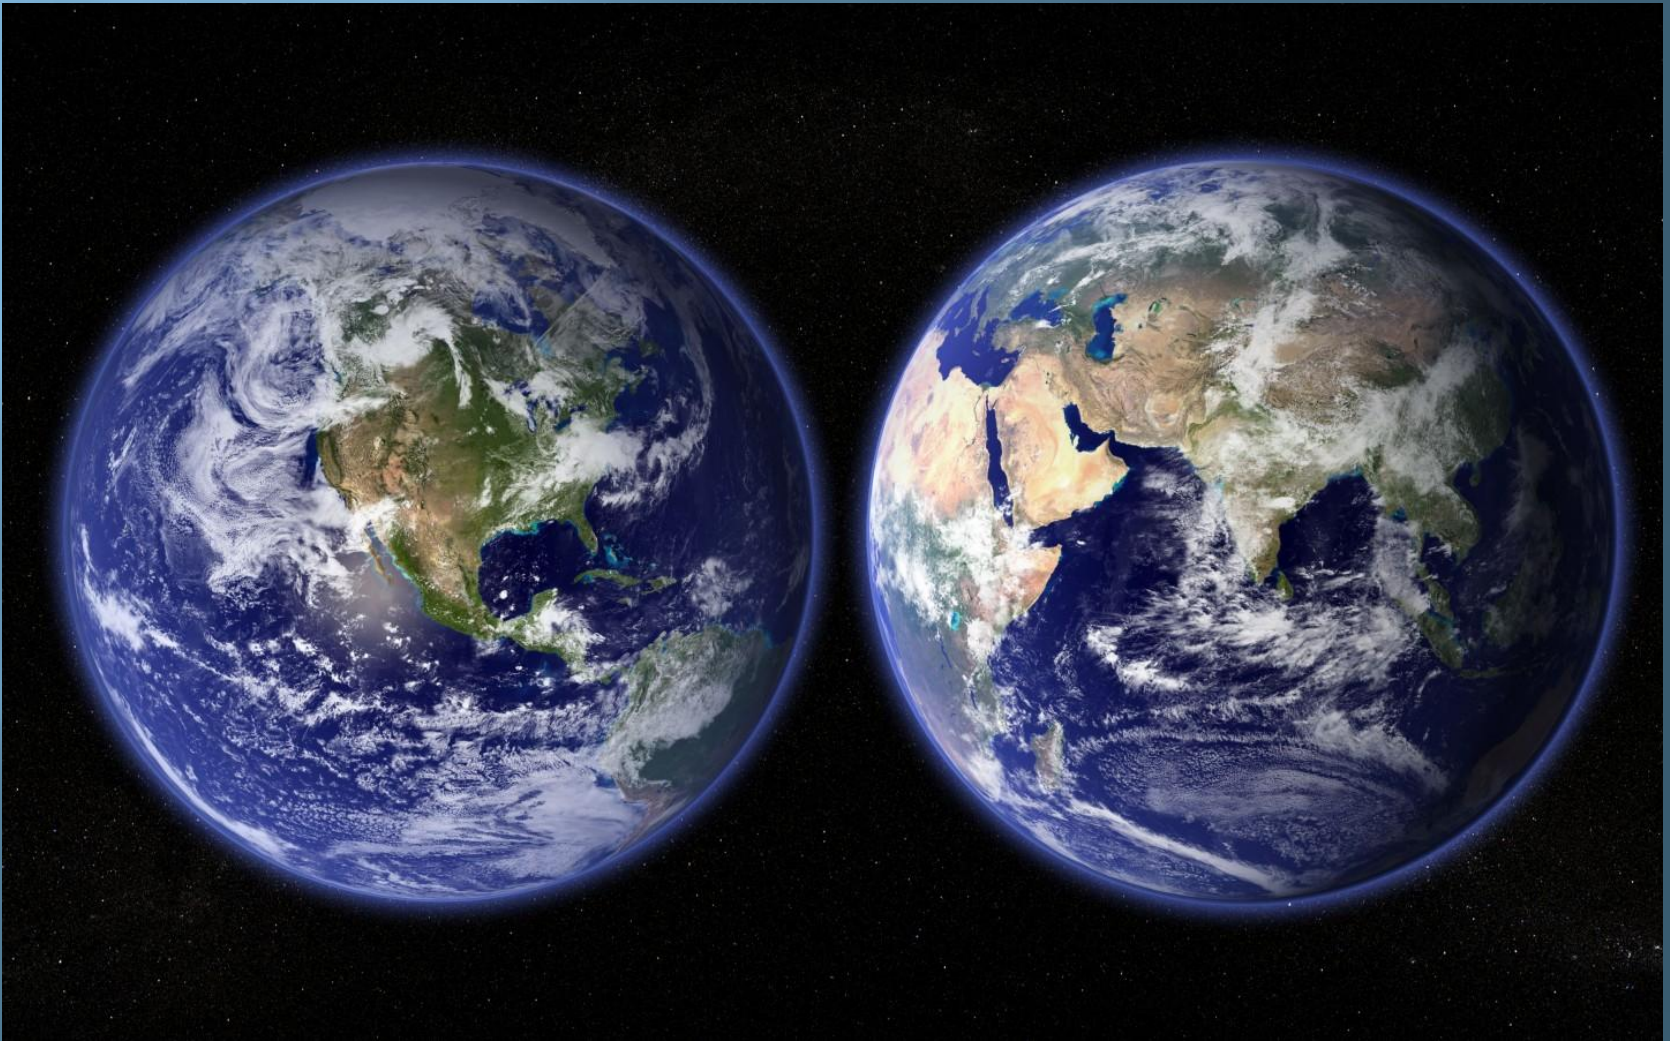

Students 8 «Б»
Akimenco S.
Suhodolova L.

- We live on the Earth .It is very ,very big . There is a lot of water on the Earth.That s why the Earth looks blue from space because 70% nearly three quarters is covered with water.

There are four oceans on the Earth : the Pacific ,the Atlantic ,the Indian and the Arctic .The oceans contain 97% of all the water on the Earth .

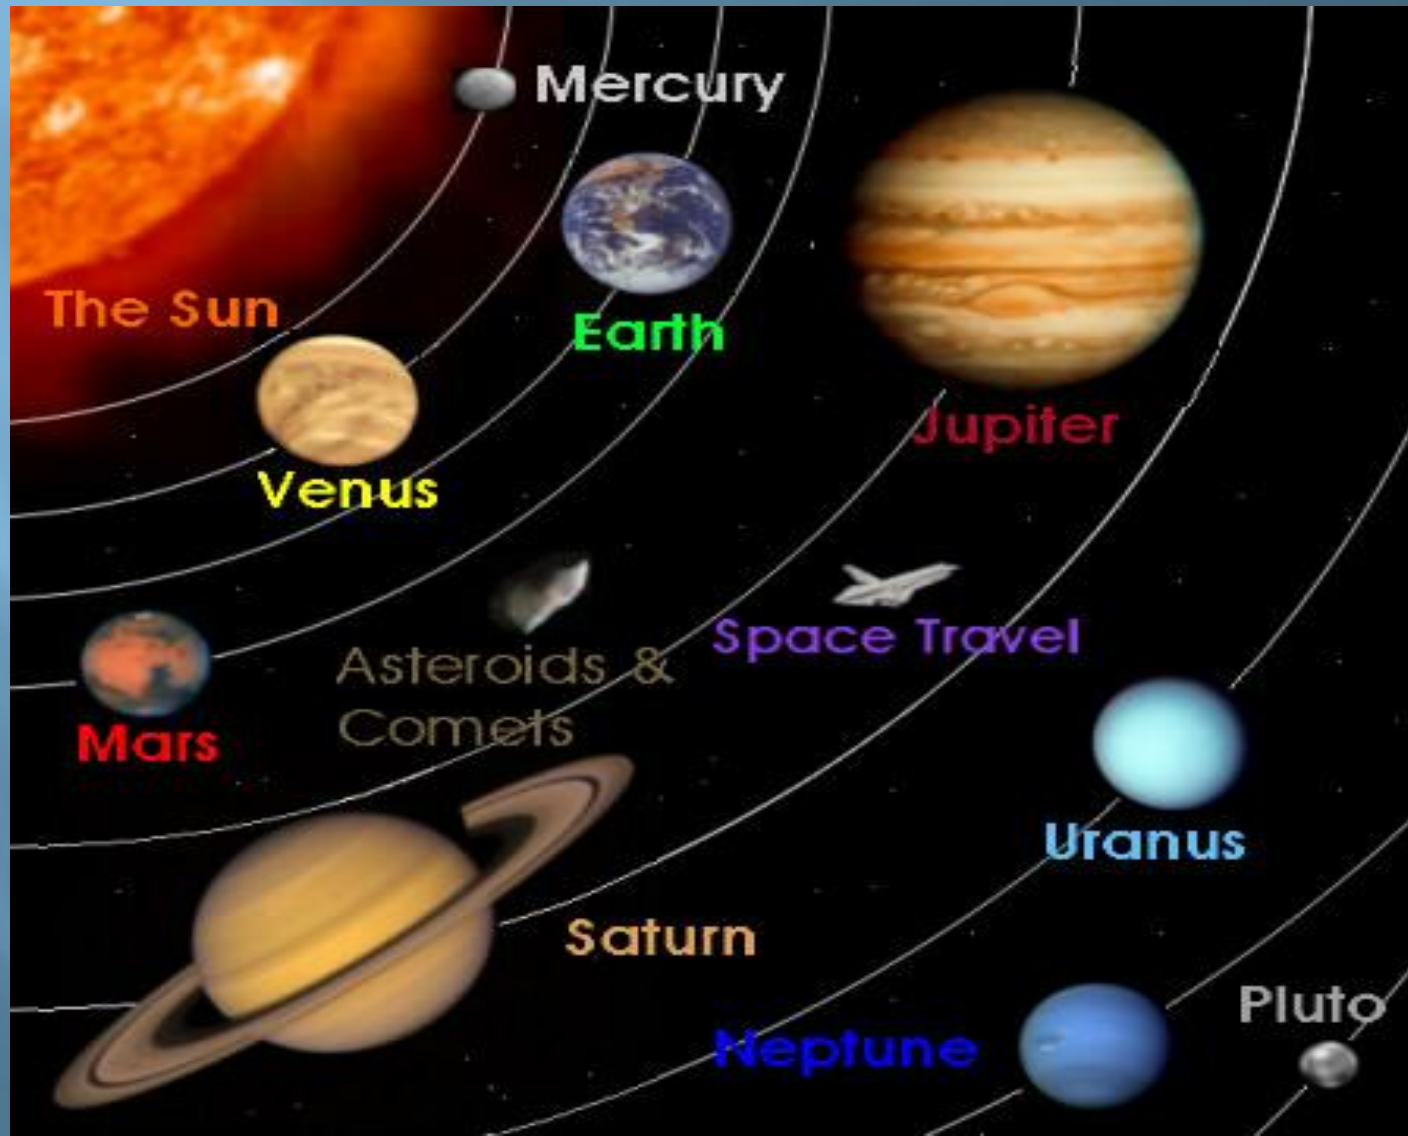

- ▣ There are large countries and small countries .
When it is day in one country it is night in another country .When the sun shines it is day ,when the sun does not shine it is night .

- ▣ You can see the moon and the stars in the sky at night .

- The Earth is the fifth largest of the nine main planets in the Solar System .It s the third planet from the Sun .

April 22 is Earth Day . People all over the world think about planet , because people live on it and use everything that are around .

- In 1961 all people on the Earth learned about the first man in space , Yuri Gagarin . He circled the Earth in Vostok spaceship.

- A lot of cosmonauts say how beautiful our blue planet is how small and fragile it is

Life on Earth
depends on
the
temperatures.
So we must
protect our
planet Earth .

- The Earth is a house for million kinds of living things .They are people and animals

Poluses of Earth coverages of ice wich include sea s ice .
Some sientists said that the Earth will sate the life of
living thing during 0.50 - 2.3 years

The And
