

TiilyPad® XL

tiilyPad[®] XL

Enterprise Point of Sale and Stock Control Software

**A refreshingly new integrated solution
designed specifically
for the Hospitality Community**

TillyPad was founded in **1995** and has grown into a major provider of enterprise solutions for restaurants, bars and other catering operations.

TillyPad is a large and progressive organisation whose products are now used in over 7,000 hospitality businesses across Russia.

With more than 30 support and development staff TillyPad is able demonstrate its commitment to continued product development and long term customer support.

The TillyPad XL software combines
a modular approach to Point of Sale with a scalable Enterprise Back Office.

The seamless integration of the two means you have a truly scalable product
that is as efficient running a single site as it is controlling a large Enterprise organisation.

Add to this the comprehensive Stock module and
you have total control across your entire estate
or single location.

Simplicity

TillyPad XL adapts to fit your business – not the other way round.

Functionality

TillyPad XL is an enterprise solution that brings all the functionality required for running individual outlets and entire chains together in a single suite.

Scalability

TillyPad XL owes its phenomenal scalability to a unique replication mechanism that enables it to expand indefinitely to keep up with the pace of your business.

TillyPad® XL

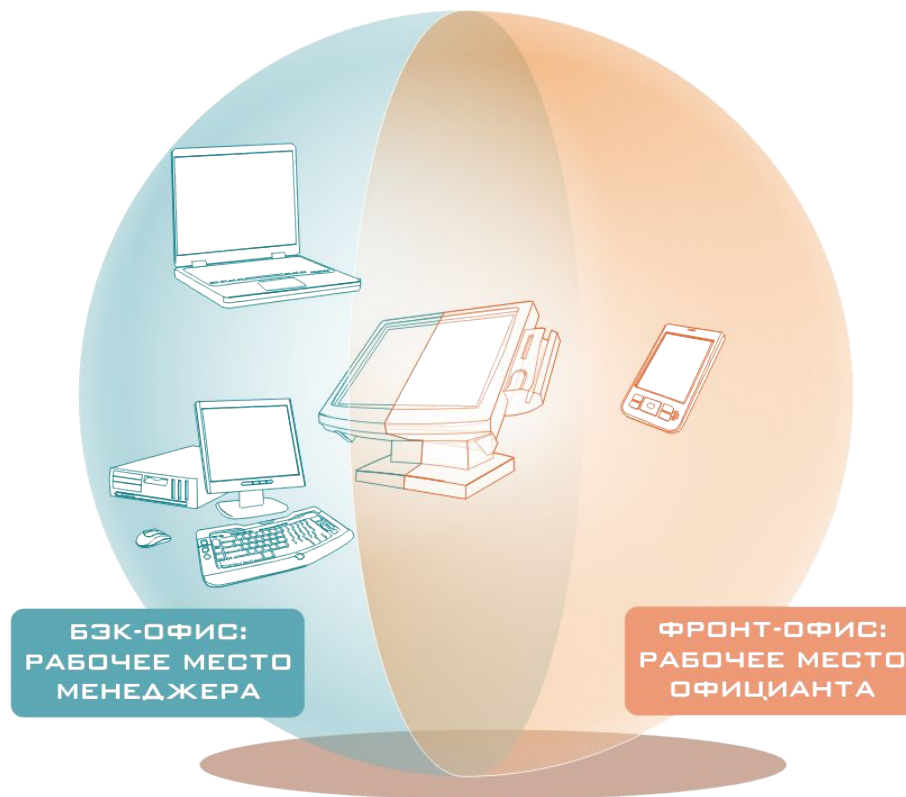

Security

TillyPad XL uses a business-oriented access model that assigns privileges to staff based on user roles and security categories to ensure maximum access control.

Efficiency

TillyPad XL is a tremendously powerful marketing and management tool that is designed to maximise income at both individual outlet and chain levels.

TillyPad XL is divided into distinct **Front office** (service) and **Back office** (management) interfaces. With easy definable roles for who has access to each.

Front office is a user-friendly workplace for service and front of house personnel. It is an easily configured and intuitive interface optimised for speed and ease of use.

The Point of Sale module can run on both an Epos Terminals and on Hand-Held waiter Pads. The use of Hand-Held terminals can simplify order taking by inputting orders directly at Point of Presence

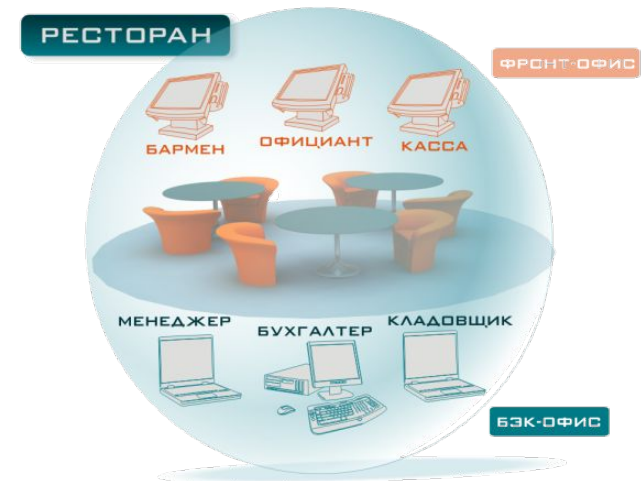

Back office is the administrative back-end of the system and the workplace for directors, store keepers, accountants, managers and admin staff

Access is via any workstation on the network or remotely through an Internet browser

Outstanding performance and reliability make TillyPad XL a best-of-breed product that brings the operation of restaurants, bars and cafes into a new level of quality.

TillyPad XL in restaurants, bars and cafes:

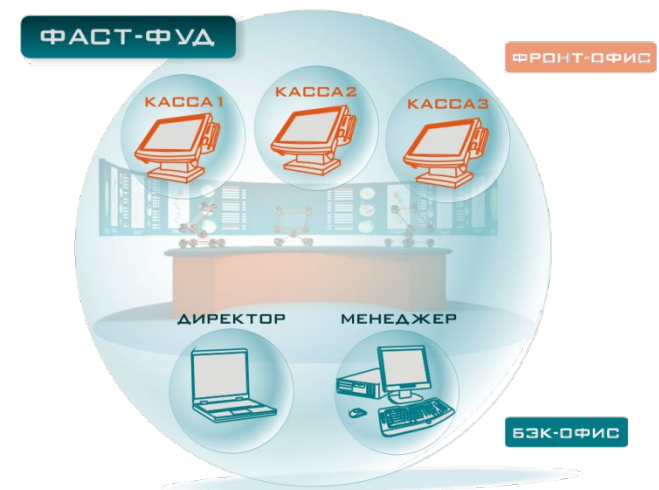

- Fast order entering
- comprehensive personnel monitoring
- instant access to detailed operational reports for the entire enterprise
- create any kind of promotion or discount
- pay by cash, cards and credit
- totally scalable – can grow with you
- hand held order terminals
- Accounts, Loyalty, Members, Cashless

TillyPad cuts down to a minimum the time taken to turn around orders in a fast-food environment.

TillyPad in fast food outlets:

- centrally managed menu for all outlets
- centralised sales reporting
- centralised promotion management
- consistency of service throughout the chain
- outlet and chain-level reports for all business operations
- geographical and regional analysis
- scalability – will grow with your business

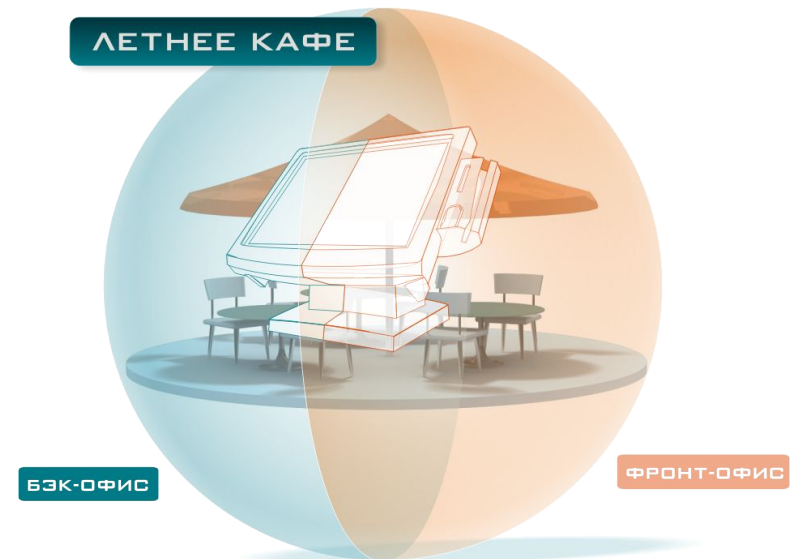

TillyPad XL gives mobile and temporary catering facilities all the functionality of a normal restaurant, no matter where they are.

Full remote access keeps management in control of any number of locations.

For extra convenience and mobility, PDA computers can be used to provide all the functionality of a stationary system.

TillyPad XL in mobile catering:

- remote monitoring of personnel and operations
- provide high-end customer service regardless of location
- detailed remote reporting for every mobile or temporary unit
- remote stock control and supplier management
- unlimited scalability

TillyPad XL is used to automate corporate catering to the highest of standards at single locations and across entire chains of locations.

TillyPad XL in corporate catering:

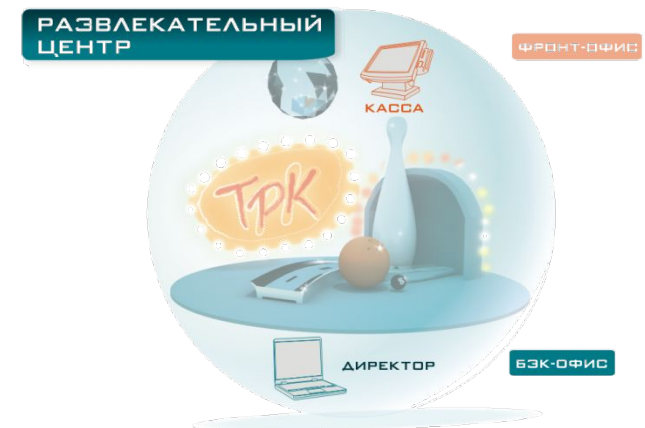

- cash-free using canteen cards, bank cards, company proximity ID cards
- unify corporate catering across company locations country-wide
- incorporation with company IT structure for salary-deductible or personal account billing
- reduce cash handling on company premises
- apply pricing and other policies to different categories of staff or visitors
- individual dietary requirements

TillyPad XL provides the leisure industry with a seamless customer service experience and comprehensive administrative controls. The diverse business processes involved in the leisure and entertainment industry are consolidated into a single integrated, manageable flow for greatly enhanced control and improved service standards.

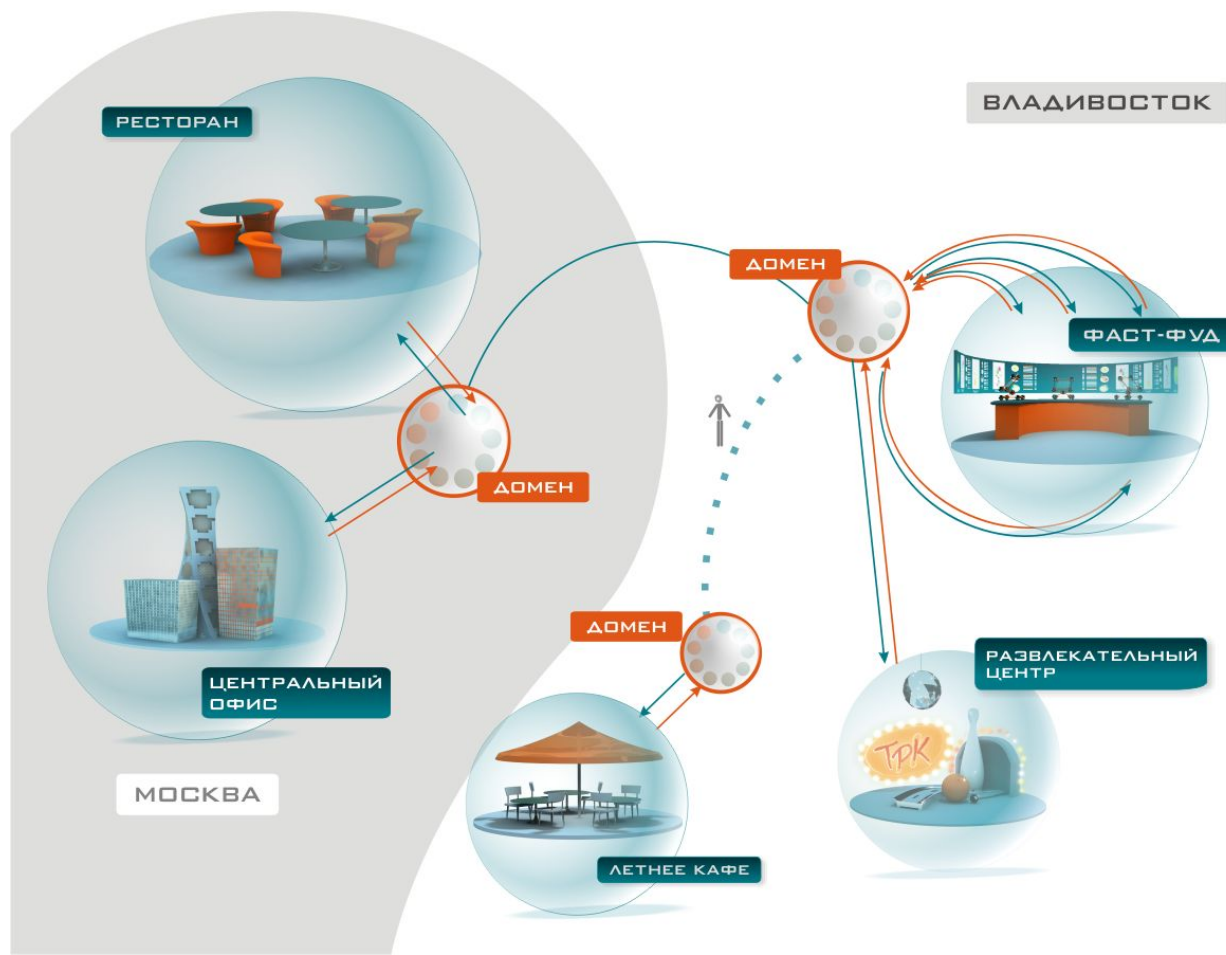

TillyPad XL in leisure and entertainment:

- seamless customer service environment
- monitor staff
- individual approach to customer service
- client accounts
- wide range of alternatives for cashless service
- flexible pricing policies
- promotions, discounts, member privileges

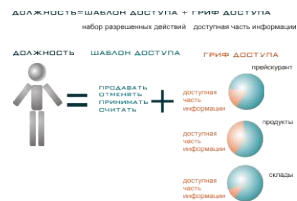

TillyPad XL is built to provide and surpass the levels of dependability that are demanded for the running of distributed outlet chains in today's demanding service environment.

The system offers a vast toolset for managing virtually all aspects of distributed chain networks. No matter where outlets are located, what type they are, and regardless of network connection quality, TillyPad XL brings everything together into a single administrative object and ensures a consistent customer service experience without sacrificing the individuality of distinct outlets in the chain.

TillyPad XL combines the latest and most advanced technologies to maximise efficiency in all aspects of the hospitality and catering business. Constant development of innovative features and new applications of existing technology keep TillyPad XL at the forefront of hospitality automation.
